"The fact that we kept coming back tells it's own story – i.e. quality, price, workmanship, friendly staff and prompt follow-up on any (rare) tiny deficiencies." Mr K, Bangor

"Excellent work from start to finish. Very pleased with the sales and installation teams and would recommend to friends and family." Ann, Belfast

About us

We're here for the long-term

Founded in 1951 as a construction company, Turkington started as a supplier and installer of PVC windows and doors for the domestic market in 1982.

In addition to supplying homeowners with high quality replacement windows, doors and conservatories, Turkington also have the expertise to supply for new and self-build projects.

Continuous improvement

Aside from offering a varied product range, we are also committed to the continuous improvement of our products within a safe working environment and in a way that reduces the impact we have on the environment.

Since its establishment, Turkington Windows has built a reputation as a leading window installer, operating on three main principles:
Quality, Service and Value… Guaranteed!

First-class service for over 65 years

At every stage of the buying process, from initial contact to completion of installation and beyond, you can expect a professional, efficient and dedicated service.

If you choose to go ahead with us, waiting time from contract to installation for replacement contracts is usually 4 to 8 weeks. Our highly skilled team of fitters carry out all installations in a professional manner and with minimal fuss and disruption to your home.

Our windows and doors are installed to an extremely high standard to ensure a perfect fit but if any issues do arise following installation, they are resolved promptly by our aftercare team.

Service backed by a ten year guarantee*

Turkington guarantee our frames, glass and installation for ten years.
We have a dedicated aftersales team to back this up. Combine this with our excellent customer service and you'll see why over 98% of our customers are so impressed they would recommend us to friends and family.

Environmental care

We continuously strive to improve our environmental performance and reduce our carbon footprint. Our environmental management systems have achieved the widely recognised ISO14001 accreditation.

We recycle all waste manufacturing materials and recycle or sustainably dispose of windows and doors that we remove from customers' homes. The old PVC is used in the eventual manufacture of new windows and the old glass is used in road aggregate and other construction materials.

** See our website for Terms & Conditions.*

- 98% customer satisfaction rating
- Window frame, glass and installation all guaranteed for ten years (T&Cs apply)

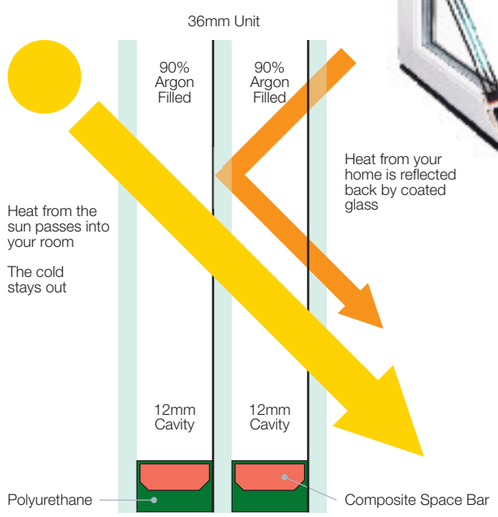
High security hinges and hinge claws

Multi-point, shoot-bolt locking

Internally glazed with integral gaskets and clean sight lines

Fully welded and steel reinforced frames

Warm and cosy



PVC Casement Windows

Made for you

Casement Windows are one of our most popular type. This classic ‘open out’ design means you can replace windows in both traditional and modern styles of property and enhance the overall appearance.

Our high-quality PVC Casement Windows combined with energy efficient ‘A’ Rated, low-e glass units fitted as standard, provide your home with cost-effective windows that will last for many years to come.

Our PVC Casements effectively seal your home from the cold with either double or triple glazing enabling considerable long-term savings due to their excellent low maintenance and weather resistant qualities.

Your Turkington windows will be bespoke to you and your home

Our PVC Casement Windows can be manufactured in a range of different styles, sizes and configurations to suit your requirements. Windows can be made fixed or side or top hung. Casement Windows can also be connected to create bay windows and can even be combined with other types of window or doors to create an ideal solution to your needs.

PVC Tilt & Turn Windows

Versatile and practical

If you are looking for a larger opening window, our Turkington PVC Tilt & Turn Windows are a great choice. The sash swings inwards so you can clean the glass without leaning out and can also act as a fire egress window. The tilt option provides ventilation whilst retaining security and privacy. This makes our PVC Tilt & Turn Window a great practical choice for many homes.

Your Turkington windows will be bespoke to you and your home

Our PVC Tilt & Turn Windows can be manufactured in a range of different styles, sizes and configurations to suit your requirements.

The windows can be made as individual units or combined with casement windows to give the option of combination openings.

PVC French Windows

Open wide

Turkington PVC French casement windows are closely related to French doors, allowing both sashes to be open without having a fixed bar in the centre. This window uses a floating mullion and allows for an unobstructed view of the outdoors whilst allowing more light and air into your home.

Our PVC casements effectively seal your home from the cold with either double or triple glazing and they can enable considerable long-term savings due to their excellent low maintenance, weather resistant qualities.

Colour options

** Depending on glass types, sizes and frame configuration.*

PVC Flush Sash Windows

Period elegance

Our Heritage Flush Sash Windows combine the beauty and elegance of traditional timber with all the benefits of PVC. Our Flush Sash Windows makes a stunning addition to both traditional and contemporary properties, transforming period homes, country cottages and modern townhouses.

The Flush Sash Window has a sleek external look with a traditional balanced feel designed to mimic the traditional appearance of period properties. In addition, the broad colour options will help to enhance your home both internally and externally.

Colour options *(for illustration purposes only)*

** Depending on glass types, sizes and frame configuration.*

PVC Sliding Sash Windows

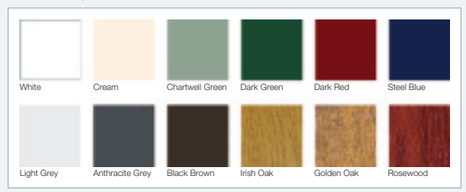
Classic charm

Turkington PVC Sliding Sash Windows are the perfect choice for period homes as they retain the classic look and beauty of a Georgian, Edwardian or Victorian property. Additionally, many new build houses will incorporate Sliding Sash to add a touch of traditional style and classic charm.

Modern Turkington Sliding Sash Windows benefit from the style of a traditional window with all the modern enhancements from the latest window technologies. These features come together to create a window which replicates the appearance of traditional timber sliders, minus the maintenance.

Our high-quality PVC Sliding Sash Windows, combined with energy efficient 'A' Rated, low-e glass fitted as standard, provides our customers with a low maintenance timber alternative that will last for many years to come.
Our PVC Sliding Sash Windows reduce your carbon footprint by effectively sealing your home from the cold with high quality, draught proof glazing and can enable considerable energy savings.

Colour options *(for illustration purposes only)*



** Depending on glass types, sizes and frame configuration.*

Aluminium Windows

Big and strong

Aluminium Windows today are nothing like previous generations.
With sophisticated security systems, clean lines, impressive window energy ratings and bespoke designs available, you can enjoy the high-quality finish for years to come.

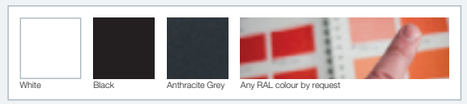
Our Aluminium Windows are made to the precise standards needed in Aluminium manufacturing and we use the latest technology, machinery and processes. Quality is at the heart of what we do, giving you the very best in Aluminium Windows for your home.

Bigger views for a brighter home

The main benefit of our Aluminium Windows is their strong frames and clean sightlines. Not only does this vastly improve the appearance of the window and the property it's installed in, the increased glass space allows more light to enter a room.

Our Aluminium Windows come as Casement or Tilt & Turn and can be suited with the ranges of Aluminium Doors that Turkington also offer.

Colour options *(for illustration purposes only)*



** Depending on glass types, sizes and frame configuration.*

Lumi Windows

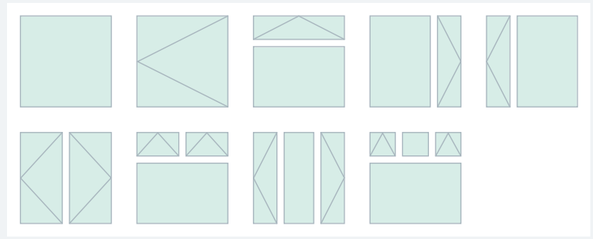
Seamless light

If you live in a modern style home and want to benefit from the latest developments in window system design, Turkington Windows are proud to supply and install Lumi Windows. With their completely flat, uninterrupted profile, these radically styled windows bring a wall of light successfully into your home.

This intelligent piece of engineering brings the design benefits of frameless glazing with all the strength, security and internal styling of more traditional windows and doors.

When opting for a Lumi Window from Turkington you get all of the specified benefits with a product that never feels invasive. The frame sports a sleek design with concealed hinges that allows for smooth action and a high weight load. The Lumi Window system allows for oversized openings and a minimalist look, offering all homeowners endless light.

Another hidden feature comes in the form of a tucked away double rebate and double gasket seal that makes for some exceptional U-values, ensuring that your home is the pinnacle of energy efficiency every time.



Colour options *(for illustration purposes only)*

PVC Back and Stable Doors

Versatile and cost-effective

Our Turkington PVC Back Doors remain a firm favourite of our customers'. The simple robust design lets the light in and keeps the draught out.

Our PVC Back Doors are a fantastic low maintenance addition to any property. Although a modern material, our PVC doors can be designed with more traditional features if you prefer a classic look for your home.

Using a PVC Stable Door allows you more freedom in how you open the door – traditional stable doors were simply one door split in two – but our Turkington design is a little more advanced than that. Made by incorporating a Tilt & Turn sash, a simple turn of the handle allows the top sash to operate independently of the door. This provides ventilation without the need of opening the whole door, as well as keeping children and pets safely indoors.

For extra security as standard all our PVC Doors come with a multi-point hook locking system and reinforced frames and panels to ensure maximum security for your home and your family.

Our high-quality PVC Doors, combined with double glazed, energy efficient 'A' Rated, low-e glass provides homeowners with a cost-effective and secure entrance door that will last for many years to come.

PVC French Doors

Open up your room

French Doors will perfectly complement any style of home. Their timeless character will add a touch of continental charm to all properties.

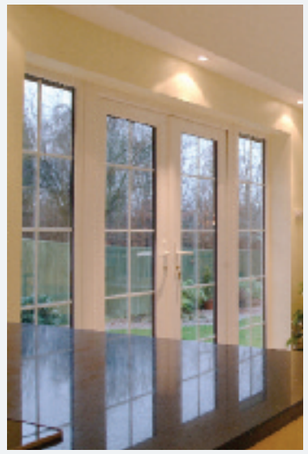
PVC French Doors from Turkington are stylish, energy efficient and secure. They are an excellent addition to any home, helping to visually improve and protect your property.

Increased natural light

Turkington French Doors are fantastic at opening-up your home to the outside. Both doors can open to create a large entranceway.

Our customers find this perfect for getting furniture in and out, and great for barbeques and parties where friends can easily mingle and move around.
Our French Doors can be designed to open in or out from your home.
The outward openers incorporate a 90° restrictor to prevent them being damaged in windy conditions.

You can also incorporate different types of glazing including leaded, Georgian, bevelled or decorative to add a touch of personal style to your doors, or use obscure glass to maintain privacy.



The perfect French Doors for your home

French Doors can be installed onto any type of property. From apartments and terraced houses to country cottages and modern detached homes, our French Doors can be designed to suit your exact requirements.

PVC French Doors from Turkington can be installed as the main entrance to your home on the front or rear of your property. They can be installed as the entrance to a conservatory or even between your conservatory and an interior room.
French Doors are a versatile addition to your home and a great investment for any homeowner.

PVC Sliding Patio Doors

More light... bigger views

Light enhances our mood: quite simply, it makes us feel good. What better way than to let more natural daylight in, than with beautifully designed, floor to ceiling, sliding patio doors?

Sliding patio doors are ideal for any style of home. Their energy efficient, streamlined design flawlessly connects indoor and outdoor spaces with ease. PVC Patio Doors from Turkington are a budget-friendly alternative to aluminium, offering robust minimalist charm, combined with far-reaching uninterrupted views.

Convenient, versatile and effortless operation guaranteed

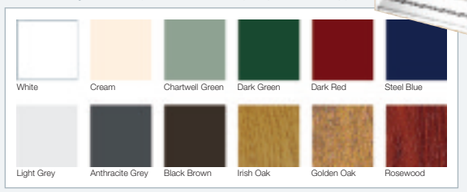
Revamp your home with a mesmerising wall of glass, whilst notably opening up the amount of available space within your home. Robust frames and lowline gaskets allow for larger expanses of glass, with the potential of two, three or four pane layouts united with an easy-glide track system.

Different types of glazing can be applied to your patio doors, including frosted glass for privacy, decorative lead, bevels or Georgian bars.

High security Patio Door design, perfect for conservatories and porches

Patio sliders can be installed onto any type of property. From maisonettes and bungalows to traditional detached and contemporary end of terrace homes, our patio doors can be tailored to meet your exact requirements.

Colour options *(for illustration purposes only)*



Design options

- Broad range of colours, over 12 standard colour options
- Available with 2, 3 or 4 panes

- High performance 28mm glazing as standard
- Multi-chambered for maximum thermal efficiency and strength
- Weather-seals that prevent draughts and leaks
- Thermally efficient multi-chamber PVC-U frames for reduced heat transmission
- Insulation from external noise

Aluminium Sliding and Lift & Slide Patio Doors

A wall of light

Our range of Aluminium Sliding and Lift & Slide Patio Doors will add another level of sophistication to your home. Allowing beautiful views across your garden or surrounding countryside, these doors are a stunning addition that will impress. They allow an abundance of natural light into your home and are easy to use.

Available in twin or triple track options, simply let it glide to the desired position. With its own tracks, these doors don't take up any extra space in your home.

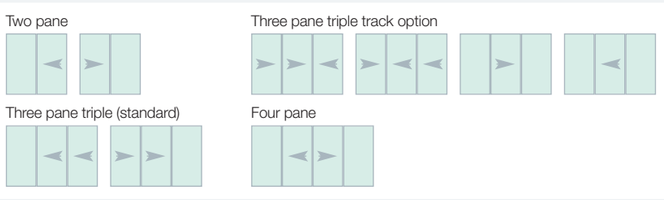
A versatile door that can transform your home. The main benefit of Aluminium is its strength, the robust frames offer great sightlines and a bigger area of glass for improved aesthetics letting more light into your home. These wide span doors feature large glass units offering unrivalled views to the outside.

These sliding doors can be up to 8m wide with four panels so, if you wish, you can have a whole wall turned into a glazed area. With their clean sightlines the focus is given to outside views.

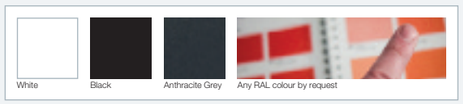
Sliding and Lift & Slide Doors are perfect for applications where it is desirable not to have door leaves opening in or out of a room. Our customers also love them because they offer a far larger glass area than a set of French Doors or Aluminium Bi-folding alternatives.

The benefits of Lift & Slide?

The Lift & Slide system allows for smoother operation on larger, heavier panels. With Lift & Slide, the doors sit down directly on the track for better thermal performance. To operate, rotate the handle 180° to lift the door up on its rollers, now the door will glide effortlessly.



Colour options *(for illustration purposes only)*



** Depending on glass types, sizes and frame configuration.*

Design options

- Sliding or Lift & Slide systems

Aluminium Bi-folding Doors

Transform your space

Aluminium Bi-folding Doors seamlessly blend your interior and exterior living space. They create a wider, open living space and flood your home with natural light. The aesthetic benefits of this product have made it a must-have addition for many homeowners.

Turkington's Aluminium Bi-folding Doors can be configured to open in a variety of ways, with multiple panes creating wide-span entrance solutions and the added option of a single-opening traffic door. They can be installed as part of a Conservatory, Sunroom or Garden Room making an impressively bright and practical living area. Why not transform your kitchen or dining area into a fully opening 'glass wall'?

With beautiful aesthetics, our range of high performance Bi-folding Doors offer benefits you can enjoy all year round. In the summer, push the panels back to let natural light and air flow into your home. In winter, sit back and enjoy the spectacular exterior views from the warmth and comfort of your home.

Our Aluminium Bi-folding Door range continues to shine through their exceptional thermal efficient qualities. Incorporating double glazed 'A' Rated, low-e glass and industry leading U-values into our technologically advanced bi-fold design reduces your carbon footprint. They provide considerable energy savings and have excellent weather resistant qualities too.

100% recyclable, this luxurious system offers additional energy efficient features by utilising a thermal break within their cutting-edge design.

Design options

- Standard colours: anthracite grey, black or white
- Bespoke colours: we can colour match to your preferred RAL colour
- Choice of door combinations

Traditional Composite Doors

Make a timeless entrance

Traditional Composite Doors are ideal for older properties, or adding a classic twist to more contemporary properties. Traditional Composite Doors are perfect for homeowners looking for a higher class of front or back door, without compromising on the classic appearance of their home. Offering exceptional security, Traditional Composite Doors are a hassle-free alternative to the standard PVC Entrance Door.

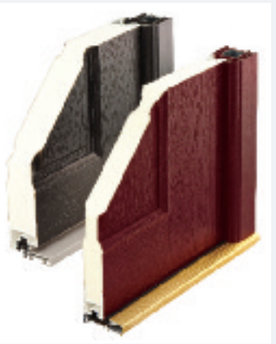
Create a strong statement with a Traditional Composite Door

First impressions really count, so make no exceptions with your front or back door. Showcasing 26 stunning styles and designs from our composite door ranges, this robust entrance choice features a remarkable insulating and secure foam core intelligently combined with a Glass Reinforced Plastic (GRP) skin.

Resistant to warping, cracking, fading and peeling, our traditional composite doors will look their best for many enjoyable years to come.

Access hundreds of style combinations

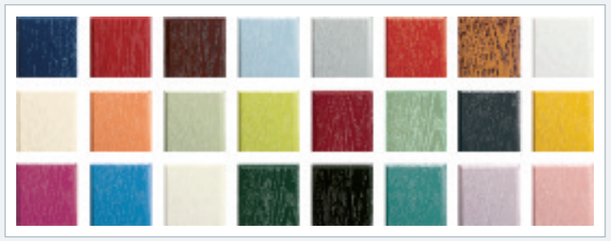
As well as a wide range of colour choices and finishes to choose from, the glazing type and additional hardware (door handles, letter boxes, etc) are also fully customisable; allowing your own individual style to shine through every little bit of your home.



Traditional Composite Doors offer exceptional energy efficient qualities, surpassing the likes of PVC Entrance Door performance. Utilising the perfect combination of thermally efficient double or triple glazed ‘A’ Rated, low-e glass, these technologically advanced entrance door structures reduce your carbon footprint. They provide considerable energy savings and have excellent weather resistant qualities too.

We use various brands for composite doors: **Apeer**, **Diamond**, **Silka**, **Modo** and **Palladio**.

Colour options *(for illustration purposes only)*



Design options

- Choice of 24 colour combinations
- Choice of 26 Door deigns
- Choice of thresholds
- Large choice of bespoke glass options
- Fused tiles, bevels and sandblasted designs are created by hand by decorative glass experts

Home Extensions

designed by you

Home Extensions

Extend your possibilities

There are few things which will enhance your home or add to your lifestyle quite like a home extension from Turkington. Whether you'd like to bring the garden into your home, have a little extra room to relax, or simply indulge yourself in a light and tranquil setting all year round, then Turkington has the answer for you. From the simple to the luxurious, a tailor-made Turkington extension is the perfect way to add style, space and value to your home.

Turkington will design and tailor your conservatory to suit your needs and complement your home. We use qualified professional surveyors and experienced designers to give the best advice and guidance on your design and build.

Designed by you

We work with you using the latest computer aided design software to let you shape exactly how your extension will look with your home.

We offer a wide variety of options on style, finish, colour and design detail to ensure you get all year round enjoyment for many years to come. Naturally each Conservatory, Sunroom or Turkington Garden Room is designed by you and is unique to you.

The only true limits to what you can achieve are your budget, the space available and your own imagination.

Turnkey service

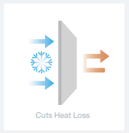
At Turkington we guide you through every stage – from your initial ideas to design, survey, building works, plumbing, electrics and final installation – bringing your ideas to reality.

Once we finish all you need to do is add a skirting board, paint the inside walls then enjoy. You will be safe in the knowledge that you have a ten year guarantee from a company who value customer service and have been in business for over 65 years.

Smart roof glass – cool in the summer, warm in the winter

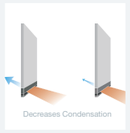
Our Turkington conservatories and lantern roofs use a technically advanced glass, specifically designed for glass roofs. Conservatories need to block out the heat from the sun in summer and retain heat in the colder days. Our glass package allows for better all year round performance, along with other key features such as increased security, UV reduction and true self-cleaning properties.

SMARTGLASS®-W key features



U-Value 1.2
Measures heat loss through the glass unit in winter months. The lower the U-Value, the warmer in winter the room will be and with a 1.2 W/m²K U-Value, this is almost three times better than a standard clear unit and 20% better than the UK's best selling low-e glass.

Solar Control
Helps reduce the build up of heat in the summer months, SMARTGLASS®-W typically blocks out 52% of the sun's rays and offers 240% more solar protection than standard glass.

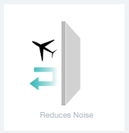


Warm Edge Spacer
Avoids heat loss at the edge of the unit, reducing internal condensation especially at the glass edge. Warm edge spacer is typically up to 950 times less conductive than standard aluminium.

Additional features for SMARTGLASS®-W Plus+

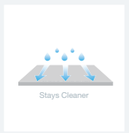
Anti-fade
Blocks out 98% of the harmful UV rays that cause damage to soft furnishings.

Enhanced Security
An additional security interlayer within the glass holds the fragments together in case of impact, making it significantly harder to gain entry this way.



Enhanced Acoustics
For a quieter conservatory this option reduces audible sound by 40% more than standard glass.

SMARTGLASS® Ultimate offers all of the above features and…



True Self Clean
Uses the same coating as the roof, to prevent the build up of dirt and grime and reduces the frequency of cleaning.

Conservatories

A bright and airy new room

There are few things which will enhance your home or add to your lifestyle quite like a new conservatory from Turkington. Whether you'd like to bring the garden into your home, have a little extra room to relax, or simply indulge yourself in a light and tranquil setting all year round, then we have the answer for you. From the simple to the luxurious, a tailor-made Turkington Conservatory is the perfect way to add style, space and value to your home.

A conservatory has a fully glazed roof in glass or polycarbonate. They bring in lots of light and add a new type of room to your home. To facilitate sunshine, conservatories are built with at least 50% and 75% of glass on the walls and roof respectively.

Designed by you

We have a broad range of contemporary and modern designs and options to make your conservatory your own.

Edwardian
Sometimes also known as a Georgian. A flat-fronted style that offers excellent use of floor space due to a square or rectangular internal shape.

Gable
A high roof slope and the same floor space as an Edwardian. The front panel of the roof remains upright rather than sloping back to the centre.

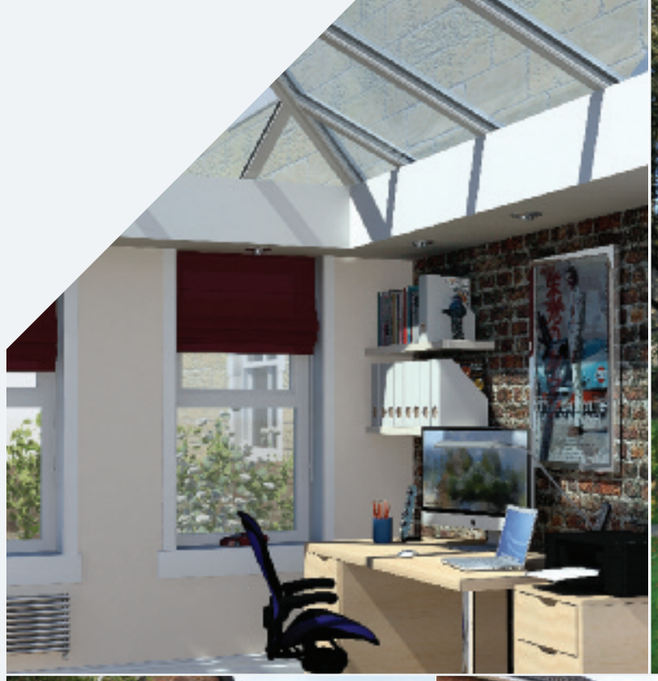
Victorian
Its distinguishing architectural feature, a bay front, with either an angled (3 bay) or slightly curved (5 bay) front, combined with a steeply pitched roof and ornate ridge.

Lean-to
Sometimes called a Mediterranean. Ideal for properties with limited space under the eaves or an awkward area in which to fit a conservatory. A Lean-to offers a variable pitch to suit your home.

P or T Shape
The P or T Shapes take their name from the plan view of each design. Ideal for larger conservatories, a P Shape can combine for example a Lean-to and a Georgian. The styles are better suited to larger properties.

** Depending on build type and circumstances.*

- Bright and airy
- Brings light into your internal room and see the stars at night
- Budget friendly
- Multiple uses meeting most peoples' needs and compliments most homes
- No impact on your rates bill
- Bespoke design options
- Easy clean roof glass, with blue tint and solar control for all year comfort
- Fully insulated walls and floor
- Building control not always required
- Quick build of around 6 weeks*
- Broad range of individual design and finishing options



Sunrooms

Cosy panoramic views

A sunroom is basically a conservatory with a solid roof and a vaulted internal ceiling. To put it another way, it is an extension with lots of windows designed to offer panoramic views. Sunrooms are specifically designed to strengthen the connection between indoors and out, allowing more natural illumination into the house and better views of the garden.

A sunroom is for those who really require an extension to their home to create more space. They can be used day or night any time of the year, so if the kids want to watch TV in the new room on a winters night then they can. Most of our clients choose to use these rooms as social spaces, often integrated into a large kitchen-diner. Some prefer to have a zone that allows them to easily relax ‘outside’. A sunroom is a flexible space for relaxing, as well as entertaining and it will become a go-to space all year round.

Designed by you

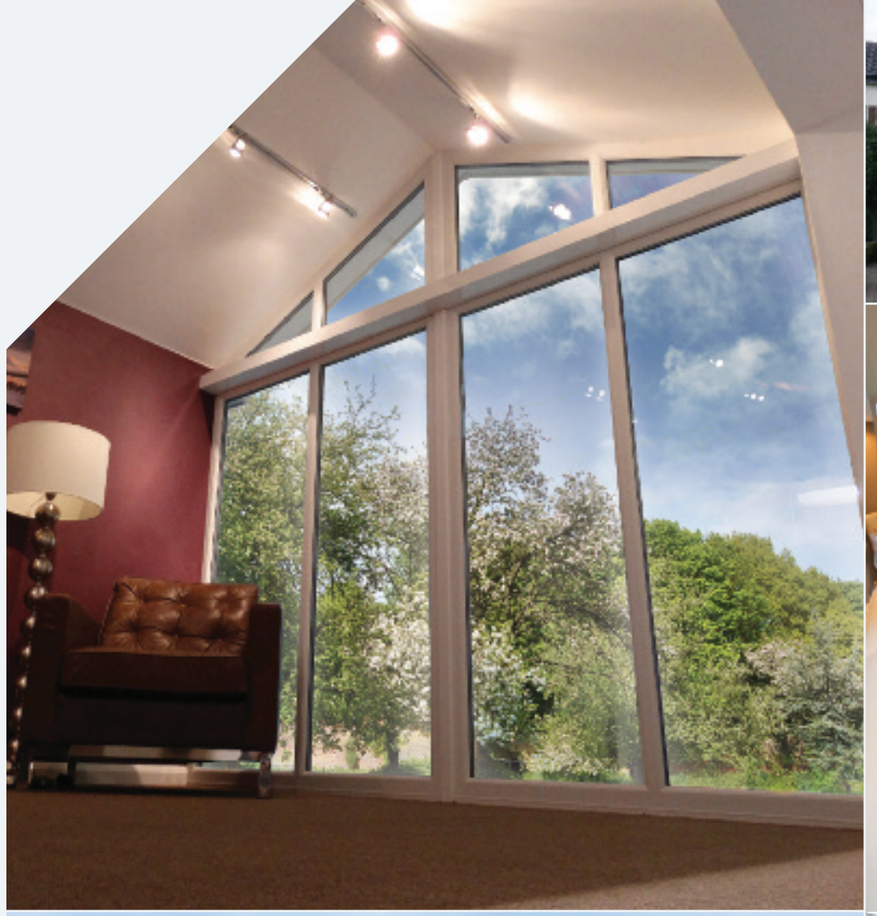
Turkington Sunrooms come in a number of design options and we will help you choose products and materials that work in aesthetic harmony with your home.

Sliding and bi-folding doors can work as windows and an entrance – they’ll look great and help connect with the outside. Additionally, skylights are also common to help flood internal rooms with natural light.

We offer a free expert design service, using state-of-the-art design software that lets you see what your extension will look like before it’s built. Our designers will work with you from start to completed design to ensure that your sunroom is bespoke to you and your lifestyle.

- Bright and airy with a vaulted ceiling
- Multiple uses which adds an extra room for your home
- Compliments most homes
- Build of around 8-10 weeks*
- Broad range of individual design and finishing options
- Fully managed installation process including plumbing, build and electrics
- Professional clean on completion
- Building control certification
- Electrical certificate upon completion
- Bespoke design and multiple colour options
- Side walls with ‘A’ Rated toughened glass, internal cills and high security locking
- Fully insulated walls, floor and roof for all year use

** Depending on build type and circumstances.*



Turkington Garden Rooms

Contemporary living

Our Turkington Garden Room range offers modern clean lines and an eye-catching contemporary feel. The roof lantern floods the interior with light, and the addition of large glass walls and roof overhang enhances the overall feel and practicality.

We use a Sika-Trocal roof which is designed for low maintenance utilising lightweight, durable and flexible membranes. Secondly, we build the shoulder higher than a standard sunroom or conservatory which lifts the ceiling higher which emphasises the big, tall and bright feeling of the Turkington Garden Room.

The roof incorporates an overhang around one, two or three sides and is a practical shelter where downlighters can also be fitted to create a great ambience. Our garden rooms are designed to open and airy and we often install aluminium Lift & Slide doors or bi-folding doors to enable you to open the room into the garden and to enjoy being inside but outside!

Designed by you

See how your garden room will look on your home before you buy. We offer a free expert design service, using state-of-the-art design software that lets you see what your Turkington Garden Room will look like before it's built.

Our computer software can superimpose a 3D rendering of your new garden room over a photograph of your home, so you can see exactly how it will look when built, allowing you to make any changes in design, before you go ahead with your choice.

- Bright and airy
- Striking contemporary design
- Build of around 8-10 weeks*
- Compliments most homes
- Multiple uses which adds an extra room for your home
- Bespoke design and multiple colour and finish options
- Fully managed installation process including plumbing, build and electrics
- Professional clean on completion
- Building control certification
- Electrical certificate upon completion
- Side walls with 'A' Rated toughened glass, internal cills and high security locking
- Fully insulated walls, floor and roof for all year use

** Depending on build type and circumstances.*

Commercial Projects

Commercial Projects

Leading the industry

As the leading specialist, Turkington Windows has been successfully delivering commercial windows, doors and curtain walling contracts for over 35 years throughout the UK and Ireland.

First for Commercial Windows, Doors and Curtain Walling

Turkington's product range includes curtain walling, structural glass curtain walling, window and door systems in both Aluminium and PVC, roof glazing, glass canopies and automated doors – all manufactured using leading locally sourced systems and components to ensure the highest levels of quality across the range.

We install only the highest quality products to meet the aesthetic and functional requirements of architects, specifiers and contractors. All of our window, door and curtain walling systems have been rigorously tested to BS EN Standards for wind resistance, water tightness and air permeability and we have product options available to meet PAS24 and 'Secured by Design' requirements.

Aluminium and PVC

Experience counts

We have extensive experience in a variety of applications including new build and replacement projects across a diverse contract portfolio, ranging from new build housing developments to commercial curtain walling and glazing contracts for retail, commercial, industrial, education and healthcare projects.

Our experienced team understand industry needs and work collaboratively with our clients to guarantee a high level of service throughout the contract ensuring lead-times are minimised and contracts are completed on time, on budget and to the clients and end users satisfaction. As part of our commitment to excellent service we will assist in value engineering projects to meet tender pricing requirements, provide working CAD drawings and design details to architects and contractors as required and can also provide project specific U-value calculations to ensure thermal performance requirements are met.

Product options

- Aluminium windows, doors and curtain walling
- PVC windows, doors and composite doors
- Toggle glazed and silicone pointed curtain walling
- Structural and bolted glass curtain walling and balustrades
- Glass canopies and roof glazing
- Brise soliel

Areas of expertise

- Commercial and retail
- Education
- Private and public sector
- Healthcare
- Residential and social housing
- New build and replacement

Meet your team

Experience counts

We have been fitting doors and windows for many years now and during that time we've grown to one of the biggest installers of doors, windows and extensions on the island of Ireland.

Here to help

Every customer and every window are important to us, from your initial contact through to you being a happy customer at the end.

Throughout the process, from reception to sales, survey, order processing, stores, fitting and after care we have many years of experience. Here is the team that makes this possible.

"The team of two workers arrived as arranged. They were very courteous and considerate inside our home, completing the job as agreed and cleaning up as they went along. Altogether a very satisfactory job, thank you. We would not hesitate to recommend and use Turkington again. We were also impressed that all the preliminary measurements, surveys etc were thoroughly carried out in advance, preventing any hiccups."

Mrs M, Waringstown

Considering quality new windows, doors or an extension installed by experienced experts? You're in the right place.

From start to finish...

Lorraine, our happy Turkington's receptionist.

The sales team. Years of experience in product knowledge and design.

A sales representative using modern CAD software to help you design your windows, doors or extension to your specifications. Everything we do is designed by you.

Our surveyors are fully qualified – they confirm sizes to the millimetre and ensure your installation is smooth and planned.

Our order processors use modern systems to ensure your designs are produced accurately.

The Turkington back office team manage your order from contract to installation, naturally this includes secure accounting for your protection.

In the Turkington stores we prepare your frames for delivery.

Our extensive store allows for safe holding. We then package every order for the fitters to ensure 'Right First Time' delivery.

Experienced installation teams know what they are doing and treat your home with care and respect.

Installations completed to the highest standard.

We invest in our teams with on-going training and, as you would expect, we are fully accredited and insured.

The Turkington 10 Year Guarantee means something… our dedicated aftersales team are here to ensure you continue to enjoy your windows, doors or home extension for years to come.
