“I like quality brands”

For over 45 years, Reynaers has been designing cutting edge glazing solutions for some of the most iconic buildings in the world. Engineered without compromise, our range of aluminium glazing products is specified time and again by the world's leading architects and construction companies.

Reynaers at Home is the domestic division of this long established and very successful global business. We are dedicated to providing the discerning British home owner with the very best products, combining style and performance without compromise.

“I like
to buy
from a
company
I feel I can
trust”

At Reynaers we have proven time and again that we can create the most stunning and complex glazing features. When you choose Reynaers at Home, you choose a company that has a wealth of experience and expertise; a company that will show the same dedication and attention to detail to even the smallest of projects as they do to the most prestigious architectural designs.

“Style is
really
important
to me”

Whether you are designing and building your own house, adding a new extension to your current home or replacing the tired old French doors with a stunning new set of bi-fold doors, choosing the right doors and windows can make the difference between the ordinary and the spectacular.

Installing Reynaers products in your home is a lifestyle statement that will not go unnoticed. When only the best is good enough, Reynaers at Home is the only choice.

“My
home
feels
special”

Any home should feel warm, safe and secure; a place where you can relax in comfort. Having worked with some of the most renowned architects in the world, we know that with some bold design, our stunning windows and doors can make your home feel truly special.

"I want windows and doors that add style and character to my house"

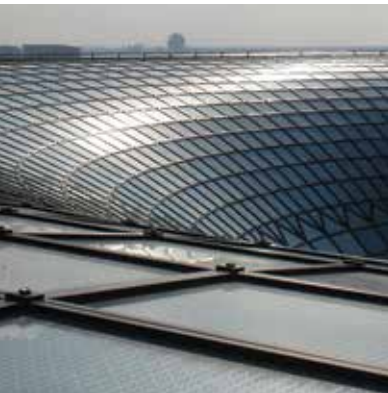

"For me, it's not about price, it's about quality and value for money"

“I want to be able to enjoy an unobstructed view”

With decades of experience of working with architectural aluminium, our doors and windows lead the way in combining structural integrity with slim frame profiles that maximise the glass area. Not only does this mean our aluminium frames are slimmer than equivalent uPVC and timber alternatives, but we can also span much greater lengths, giving you unobstructed panoramic views.

“I love contemporary design”

It is no coincidence that aluminium is widely used as a window and door frame material in the most prestigious and iconic new buildings around the world. Select from hundreds of hard wearing, durable colour finishes and rest assured that they will never need repainting. What is more, expansion and contraction with changes in temperature are kept to a minimum, making aluminium the only sensible choice for bi-fold doors, patio doors and large picture windows.

“I like to have things that are different”

Most commonly used in projects with a more contemporary design, aluminium is often overlooked as a suitable material for more traditional properties. Our slim frame profiles mimic the sightlines of old Crittall windows, and a modern glass extension can both contrast and complement an older character property.

“I don't mind
paying a bit
more for
a quality
brand”

With a world class testing and design centre and many years of industry experience, Reynaers at Home are proud to be pushing the boundaries of product quality and performance. All our products are tested to meet and often exceed the British and European standards for security, weather resistance, thermal insulation, durability and noise reduction and have been installed in some of the most exposed locations.

“I want windows and doors that look stunning”

“My home tells other people
who I am”

Bi-fold doors can transform an ordinary room and make it a feature of the house, opening up the house to the garden and letting the outside in. An innovative, modern design statement, our aluminium bi-fold doors offer industry-leading sizes, giving your house the real wow factor.

"I take
pride
in my
home"

Huge unobstructed glass areas and an effortless sliding mechanism combine to make our sliding doors the perfect solution for rooms with a view. Designed with security and weather resistance in mind, these low maintenance doors combine state-of-the-art performance with stunning aesthetics.

“Returning home puts a smile on my face”

For something really special, you can choose our pivot door. Unusual and versatile, this beautifully weighted door can make a wonderful feature in any home and will put a smile on your face every time you use it.

“I like to entertain friends and family in my home”

The garden can be a wonderful entertaining area, but is limited in its use by the unpredictable British weather. Our versatile patio glazing helps protect you from the worst of the elements, whilst still allowing you an unobstructed view of the garden. Couple this with a veranda to keep the rain off, and your garden can be used for regular entertaining, whatever the weather.

"I will only buy products for my home that have been thoroughly tested and are known to be reliable"

"I love light
and airy living
spaces"

Whether you want a modern conservatory, a more traditional orangery or a stylish window in the roof to let light into your new extension, Reynaers at Home can offer a made-to-measure solution that is perfect for your home. What is more, you can include our patio doors or bi-fold doors in the design to give a truly spectacular additional living space.

“I like to keep my home looking good”

As you would expect, Reynaers at Home offers a comprehensive range of complementary windows and doors. Whether you choose a fixed panoramic window, a tilt-turn window, a parallel opening window or a casement window, you can rest assured that they are all designed to offer uncompromising performance and stunning aesthetics.

“I want my home to be individual”

All Reynaers at Home products are made-to-measure to meet your very specific individual requirements. With all our products you can choose from hundreds of colours with a matt or gloss finish, you can have a realistic wood-grain effect or for a real wow factor, choose one of our stunning metallic finishes. You can even have a different colour inside and out.

“Looking
after the
environment
is important
to me”

Aluminium is an abundant material that is infinitely recyclable with no loss of quality. What is more, the industry-leading thermal insulation that our products offer will help keep your energy bills down and that helps the environment too.

"I love the idea of being able to open up the house to the garden on a sunny day"

At Reynaers at Home we constantly seek to develop and improve our products and service for our customers and therefore reserve the right to amend our product specification from time to time. The photographs in this brochure show Reynaers products which may occasionally differ in detail and appearance from those we currently sell.
