About us

We're here for the long-term

Founded in 1951 as a construction company, Turkington started as a supplier and installer of PVC windows and doors for the domestic market in 1982.

In addition to supplying homeowners with high quality replacement windows, doors and conservatories, Turkington also have the expertise to supply for new and self-build projects.

Continuous improvement

We are also committed to the continuous improvement of our products within a safe working environment and in a way that reduces the impact we have on the environment.

Since its establishment, Turkington Windows has built a reputation as a leading window installer, operating on three main principles: **Quality, Service and Value... Guaranteed!**

First-class service for over 70 years

At every stage of the buying process, from initial contact to completion of installation and beyond, you can expect a professional, efficient and dedicated service.

If you choose to go ahead with us, waiting time from contract to installation for replacement contracts is usually 8 to 14 weeks. Our highly skilled team of fitters carry out all installations in a professional manner and with minimal fuss and disruption to your home.

Our windows and doors are installed to an extremely high standard to ensure a perfect fit but if any issues do arise following installation, they are resolved promptly by our aftercare team.

Service backed by a ten year guarantee*

Turkington guarantee our frames, glass and installation for ten years. Combine this with our excellent customer service and you'll see why over 98% of our customers are so impressed they would recommend us to friends and family.

Environmental care

We continuously strive to improve our environmental performance and reduce our carbon footprint. Our environmental management systems have achieved the widely recognised ISO14001 accreditation.

We recycle all waste manufacturing materials and recycle or sustainably dispose of windows and doors that we remove from customers' homes. The old PVC is used in the eventual manufacture of new windows and the old glass is used in road aggregate and other construction materials.

- 98% customer satisfaction rating
- Window frame, glass and installation all guaranteed for ten years (T&Cs apply)
- Fully managed installation process
- Bespoke designs by you for you
- Majority of our work comes through referrals and recommendations
- Over 70 years in business
- Established in 1951 and still family owned so we're here for the long-term
- Quality installation and service
- BFRC approved 'A' Rated windows
- Fully Accredited
- Experienced teams throughout your contract
- Our installers fit exclusively for us... most have been with us for over 25 years
- GGF agreed code of conduct covering sales, contracts, installation and aftersales
- Turkington hold all required contractors' public and professional liability insurances
- Fully qualified and experienced surveyors
- Dedicated aftersales team
- Audited through the BSI for quality, environmental standards and health and safety
- Market-leading product range
- Comprehensive showrooms so you can choose with peace of mind
- Contemporary and traditional product ranges – choose what is right for your home
- **Turkington – Quality to a 'T'**

PVC Casement Windows

Made for you

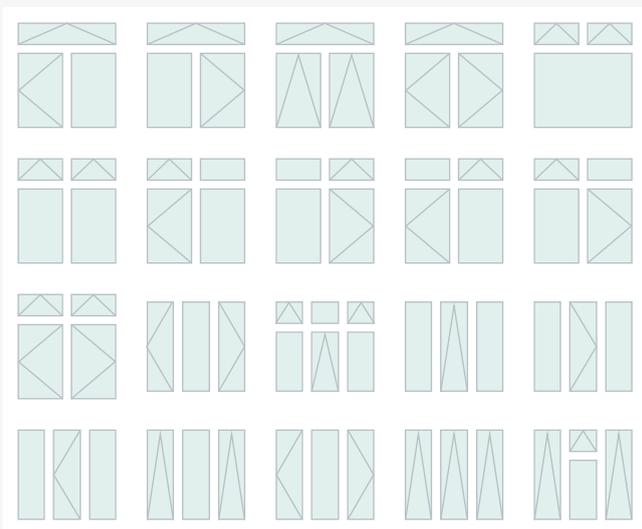

Casement Windows are one of our most popular type. This classic 'open out' design means you can replace windows in both traditional and modern styles of property and enhance the overall appearance.

Our high-quality PVC Casement Windows combined with energy efficient 'A' Rated, low-e glass units fitted as standard, provide your home with cost-effective windows that will last for many years to come.

Our PVC Casements effectively seal your home from the cold with either double or triple glazing enabling considerable long-term savings due to their excellent low maintenance and weather resistant qualities.

Your Turkington windows will be bespoke to you and your home

Our PVC Casement Windows can be manufactured in a range of different styles, sizes and configurations to suit your requirements. Windows can be made fixed, side or top hung. Casement Windows can also be connected to create bay windows and can even be combined with other types of window or doors to create an ideal solution to your needs.

Some of your colour options *(for illustration purposes only)*

* Depending on glass types, sizes and frame configuration.

Design options

- Over 24 colour options including dual coloured frames
- Contemporary chamfered frame or traditional sculptured choice
- Side or top hinges
- Easy clean hinges
- Fire egress hinges
- Georgian bar, lead, astragal bar, bevel options and run-through horn choices
- Choice of obscured glasses
- Clean and fresh designs to enhance your home
- Choice of handle colours
- Choice of glazing options
- Individual design options to suit your home
- Low maintenance

Enhanced security as standard

- Shoot-bolt locking
- Restrictors for safety
- 'Turkington Secure' design
- Locking handle
- Roller cams
- Hinge claws
- Reinforced frame
- Internally glazed
- Security and safety glass options

Warm and cosy

- Energy Efficient 'A' Rating

PVC Tilt & Turn Windows

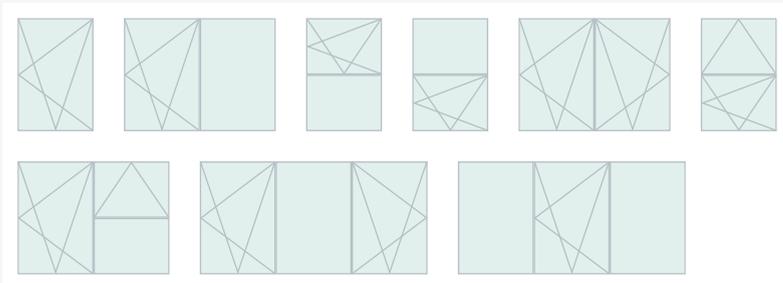

Versatile and practical

If you are looking for a larger opening window, our Turkington PVC Tilt & Turn Windows are a great choice. The sash swings inwards so you can clean the glass without leaning out and can also act as a fire egress window. The tilt option provides ventilation whilst retaining security and privacy. This makes our PVC Tilt & Turn Window a great practical choice for many homes.

Your Turkington windows will be bespoke to you and your home

Our PVC Tilt & Turn Windows can be manufactured in a range of different styles, sizes and configurations to suit your requirements.

The windows can be made as individual units or combined with casement windows to give the option of combination openings.

Some of your colour options *(for illustration purposes only)*

* Depending on glass types, sizes and frame configuration.

PVC French Windows

Open wide

Turkington PVC French casement windows are closely related to French doors, allowing both sashes to be open without having a fixed bar in the centre. This window uses a floating mullion and allows for an unobstructed view of the outdoors whilst allowing more light and air into your home.

Our PVC casements effectively seal your home from the cold with either double or triple glazing and they can enable considerable long-term savings due to their excellent low maintenance, weather resistant qualities.

Colour options

* Depending on glass types, sizes and frame configuration.

PVC Flush Sash Windows

Period elegance

Our Heritage Flush Sash Windows combine the beauty and elegance of traditional timber with all the benefits of PVC. Our Flush Sash Windows makes a stunning addition to both traditional and contemporary properties, transforming period homes, country cottages and modern townhouses.

The Flush Sash Window has a sleek external look with a traditional balanced feel designed to mimic the traditional appearance of period properties. In addition, the broad colour options will help to enhance your home both internally and externally.

PVC Sliding Sash Windows

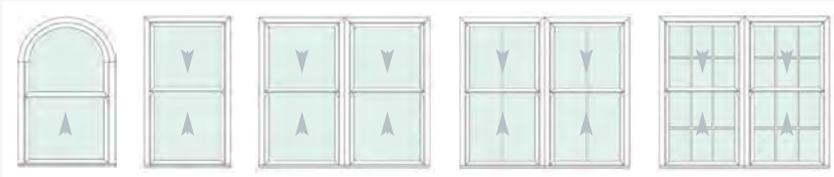

Classic charm

Turkington PVC Sliding Sash Windows are the perfect choice for period homes as they retain the classic look and beauty of a Georgian, Edwardian or Victorian property. Additionally, many new build houses will incorporate Sliding Sash to add a touch of traditional style and classic charm.

Modern Turkington Sliding Sash Windows benefit from the style of a traditional window with all the modern enhancements from the latest window technologies. These features come together to create a window which replicates the appearance of traditional timber sliders, minus the maintenance.

Our high-quality PVC Sliding Sash Windows, combined with energy efficient 'A' Rated, low-e glass fitted as standard, provides our customers with a low maintenance timber alternative that will last for many years to come.

Our PVC Sliding Sash Windows reduce your carbon footprint by effectively sealing your home from the cold with high quality, draught proof glazing and can enable considerable energy savings.

Some of your colour options *(for illustration purposes only)*

- Choice of glazing options including double, triple, acoustic and anti-bandit
- Multi-chambered frames
- Reduces heat loss
- Designed to eliminate draughts
- Warm edge spacer bar with built in energy saving

Aluminium Windows

Beautiful technology

The main benefit of our Aluminium Windows is their strong frames and clean sightlines. Not only does this vastly improve the appearance of the window and the property it's installed in, the increased glass space allows more light to enter a room.

Our Aluminium Windows come as Casement or Tilt & Turn and can be suited with the ranges of Aluminium Doors that Turkington also offer.

This versatile range of profiles can provide many solutions for your home. It can create traditional casement windows inspired by the elegance and styling of timber products, or contemporary style windows designed for modern homes.

Our Aluminium Window incorporate polyamide thermal break technology which creates a barrier between the cold air outside and the warm air inside.

This technology significantly reduces thermal transmittance and enhances the overall 'U' Value of a product and is designed to meet the exacting requirements of Document L 2010.

Design options

- White, black and grey colour options as standard
- Any RAL colour for bespoke colour choices
- Side, top and Tilt & Turn hinge options
- Easy clean hinges available
- Fire egress hinges available
- Locking handles in gold, chrome, white and satin silver
- Contemporary look outer frame
- Georgian bar, lead and bevel glass choices
- Choice of obscured glass
- Clean and fresh designs to enhance your home
- Low maintenance, extremely durable powder coated aluminium
- Customisation options including angled units

Enhanced security as standard

- Durability and strength
- 'Turkington Secure' design
- Internally glazed

Warm and cosy

- Energy Efficient 'A' Rating
- Double rebated design to eliminate draughts
- Thermally broken, energy efficient frames
- Typical 'U' Value 1.6 W/m²K (using 1.0 W/m²K centre pane)
- Air 600Pa
- Water 1,200Pa
- Wind 2,400Pa
- Side Hung Max Width 1,000mm
- Side Hung Max Height 1,400mm
- Top Hung Max Width 1,400mm
- Top Hung Max Height 1,500mm
- Designed to comply with the revisions to the Building Regulations Document L 2010
- British Standard Kitemark KM81580
- British Standard Kitemark KM81543
- BS 4873:2016
- BS 6375-1:2009
- BS 7950:1997
- Marine quality polyester coated as standard

Heritage Aluminium Windows

Old school, new techniques

Our Heritage windows provide a great solution for applications such as listed building renovations, replica-refurbishment projects and achieve that 'old school' metal window look.

The window is designed to be built as a series of horizontal modules which can be stacked using horizontal couplers to form a multi-part window featuring a specially designed drip bar between modules.

Our Heritage profiles utilise innovative polyamide thermal break technology which creates a barrier between the cold air outside and the warm air inside.

This technology significantly reduces thermal transmittance and enhances the overall 'U' Value of a product and is designed to meet the exacting requirements of Document L 2010.

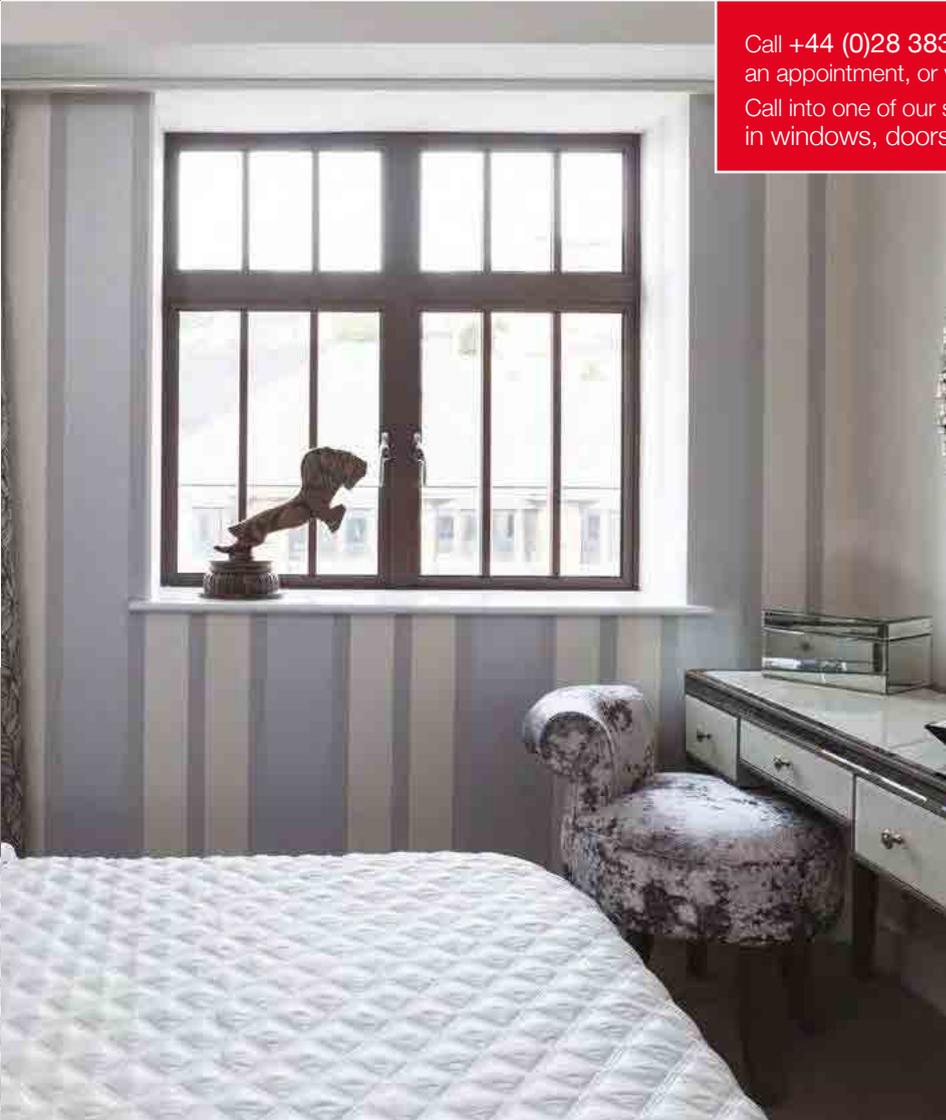

Alitherm Heritage products are available in a choice of standard or non-standard colours, including metallic, dual colour, Smart's Sensations textured, and Alchemy anodised effect finishes.

- Fixed windows, tilt turn, side hung or top hung open out casements
- Polyamide thermal break provides enhanced thermal performance
- Designed as a direct replacement for steel windows
- Single or dual colour, marine quality polyester powder coat as standard
- 316 Marine Grade Stainless Steel Hardware options
- Heritage and Art Deco hardware options
- Security tested to PAS 24:2016
- Weather tested to BS 6375 Part 1:2009
- British Standard Kitemark KM 81543
- British Standard Kitemark KM 81580

Lumi Windows

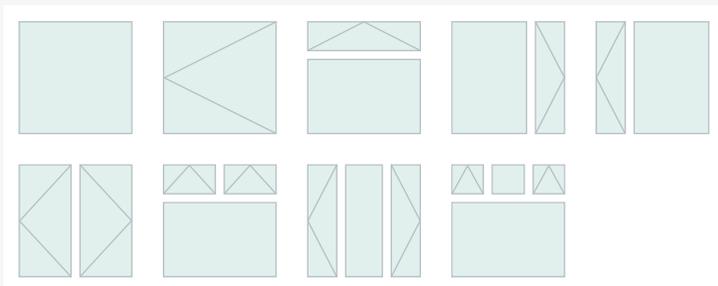

Seamless light

If you live in a modern style home and want to benefit from the latest developments in window system design, Turkington Windows are proud to supply and install Lumi Windows. With their completely flat, uninterrupted profile, these radically styled windows bring a wall of light successfully into your home.

This intelligent piece of engineering brings the design benefits of frameless glazing with all the strength, security and internal styling of more traditional windows and doors.

When opting for a Lumi Window from Turkington you get all of the specified benefits with a product that never feels invasive. The frame sports a sleek design with concealed hinges that allows for smooth action and a high weight load. The Lumi Window system allows for oversized openings and a minimalist look, offering all homeowners endless light.

Another hidden feature comes in the form of a tucked away double rebate and double gasket seal that makes for some exceptional 'U' Values, ensuring that your home is the pinnacle of energy efficiency every time.

Design options

- Sleek modern design
- Choice of external colour options
- Broad range of internal frame foil finishes
- Bigger sizes
- Suited with a full range of doors and sliding doors
- Contemporary frameless wall to wall glass

Enhanced security as standard

- Weather resistant
- High security lock
- Bonded glazing
- Restrictor stays to ensure safe operation
- Exceptionally strong and durable frames

Warm and cosy

- Energy Efficiency 'A' Rated as standard
- Typical Double Glazed 'U' Values **1.2-1.4 W/M²K***
- Typical Triple Glazed 'U' Values **0.8-1.0 W/M²K***
- Triple glazed
- Foam insulation for extra energy efficiency
- Double rebated storm-proof design
- Double gasket seal for excellent thermal and noise performance
- Low thermal conductivity
- Warm edge spacer bar with built in energy saving

* Depending on glass types, sizes and frame configuration.

PVC Entrance Doors

Versatile and cost-effective

Our PVC Entrance Doors are a fantastic low-maintenance addition to any property. Although a modern material, our PVC doors can be designed with more traditional features if you prefer a classic look for your home's entrance.

We supply and install a range of PVC Entrance Doors, using market leading systems offering multiple benefits at an affordable price. Our doors can be manufactured in a range of different styles with optional additions such as sidelights. They can also incorporate different types of glazing including obscure glass to maintain privacy and leaded or decorative glass to add a touch of personal style to your door. Our high-quality PVC Entrance Doors, combined with double glazed energy efficient 'A' Rated, low-e glass provides homeowners with a cost-effective Entrance Door that will last for many years to come.

Some of your colour options *(for illustration purposes only)*

Design options

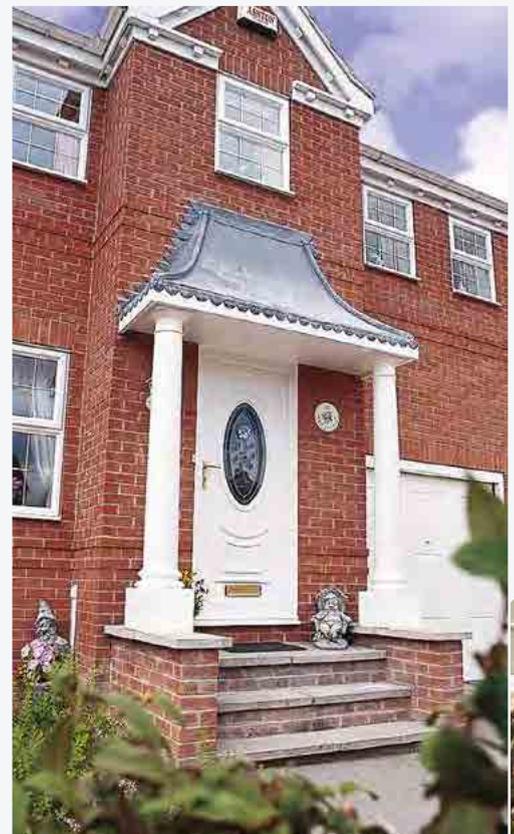

- Broad range of colours

- Allows free heat energy in from solar gain
- Double rebated for draught-proof comfort

PVC Back and Stable Doors

Versatile and cost-effective

Our Turkington PVC Back Doors remain a firm favourite of our customers'. The simple robust design lets the light in and keeps the draught out.

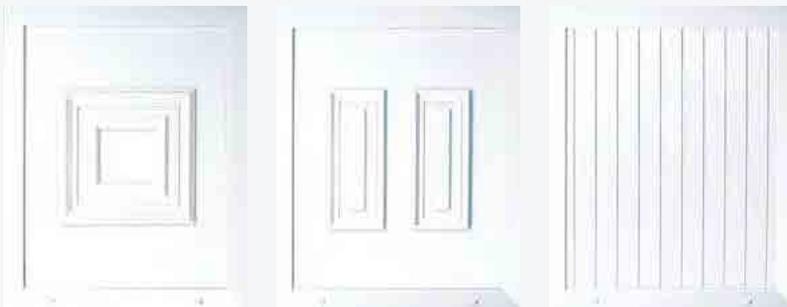

Our PVC Back Doors are a fantastic low maintenance addition to any property. Although a modern material, our PVC doors can be designed with more traditional features if you prefer a classic look for your home.

Using a PVC Stable Door allows you more freedom in how you open the door – traditional stable doors were simply one door split in two – but our Turkington design is a little more advanced than that. Made by incorporating a Tilt & Turn sash, a simple turn of the handle allows the top sash to operate independently of the door. This provides ventilation without the need of opening the whole door, as well as keeping children and pets safely indoors.

For extra security as standard all our PVC Doors come with a multi-point hook locking system and reinforced frames and panels to ensure maximum security for your home and your family.

Our high-quality PVC Doors, combined with double glazed, energy efficient 'A' Rated, low-e glass provides homeowners with a cost-effective and secure entrance door that will last for many years to come.

PVC French Doors

Open up your room

French Doors will perfectly complement any style of home. Their timeless character will add a touch of continental charm to all properties.

PVC French Doors from Turkington are stylish, energy efficient and secure. They are an excellent addition to any home, helping to visually improve and protect your property.

Increased natural light

Turkington French Doors are fantastic at opening-up your home to the outside. Both doors can open to create a large entranceway.

Our customers find this perfect for getting furniture in and out, and great for barbeques and parties where friends can easily mingle and move around.

Our French Doors can be designed to open in or out from your home.

The outward openers incorporate a 90° restrictor to prevent them being damaged in windy conditions.

You can also incorporate different types of glazing including leaded, Georgian, bevelled or decorative to add a touch of personal style to your doors, or use obscure glass to maintain privacy.

The perfect French Doors for your home

French Doors can be installed onto any type of property. From apartments and terraced houses to country cottages and modern detached homes, our French Doors can be designed to suit your exact requirements.

PVC French Doors from Turkington can be installed as the main entrance to your home on the front or rear of your property. They can be installed as the entrance to a conservatory or even between your conservatory and an interior room. French Doors are a versatile addition to your home and a great investment for any homeowner.

PVC Sliding Patio Doors

More light... bigger views

Light enhances our mood: quite simply, it makes us feel good. What better way than to let more natural daylight in, than with beautifully designed, floor to ceiling, sliding patio doors?

Sliding patio doors are ideal for any style of home. Their energy efficient, streamlined design flawlessly connects indoor and outdoor spaces with ease. PVC Patio Doors from Turkington are a budget-friendly alternative to aluminium, offering robust minimalist charm, combined with far-reaching uninterrupted views.

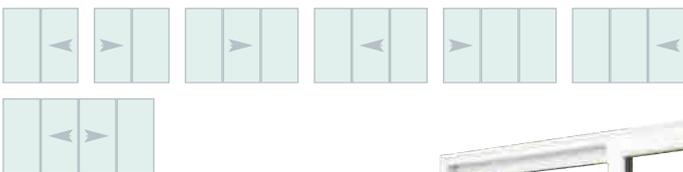

Convenient, versatile and effortless operation guaranteed

Revamp your home with a mesmerising wall of glass, whilst notably opening up the amount of available space within your home. Robust frames and lowline gaskets allow for larger expanses of glass, with the potential of two, three or four pane layouts united with an easy-glide track system.

Different types of glazing can be applied to your patio doors, including frosted glass for privacy, decorative lead, bevels or Georgian bars.

High security Patio Door design, perfect for conservatories and porches

Patio sliders can be installed onto any type of property. From maisonettes and bungalows to traditional detached and contemporary end of terrace homes, our patio doors can be tailored to meet your exact requirements.

Some of your colour options (for illustration purposes only)

Design options

- Broad range of colours
- Available with 2, 3 or 4 panes
- Choice of Chamfered or Sculptured frame finishes

- Thermally efficient multi-chamber PVC-U frames for reduced heat transmission
- Insulation from external noise

Traditional Composite Doors

Make a timeless entrance

Traditional Composite Doors are ideal for older properties, or adding a classic twist to more contemporary properties. Traditional Composite Doors are perfect for homeowners looking for a higher class of front or back door, without compromising on the classic appearance of their home. Offering exceptional security, Traditional Composite Doors are a hassle-free alternative to the standard PVC Entrance Door.

Create a strong statement with a Traditional Composite Door

First impressions really count, so make no exceptions with your front or back door. Showcasing 26 stunning styles and designs from our composite door ranges, this robust entrance choice features a remarkable insulating and secure foam core intelligently combined with a Glass Reinforced Plastic (GRP) skin.

Resistant to warping, cracking, fading and peeling, our traditional composite doors will look their best for many enjoyable years to come.

Access hundreds of style combinations

As well as a wide range of colour choices and finishes to choose from, the glazing type and additional hardware (door handles, letter boxes, etc) are also fully customisable; allowing your own individual style to shine through every little bit of your home.

Traditional Composite Doors offer exceptional energy efficient qualities, surpassing the likes of PVC Entrance Door performance. Utilising the perfect combination of thermally efficient double or triple glazed 'A' Rated, low-e glass, these technologically advanced entrance door structures reduce your carbon footprint. They provide considerable energy savings and have excellent weather resistant qualities too.

We use various brands for composite doors: Apeer, Diamond, Silka, Modo and Palladio.

Some of your colour options *(for illustration purposes only)*

Design options

- Choice of 24 colour combinations
- Wide choice of door designs

- PAS24 approved locking
- Steel reinforced frame
- High-density polyurethane core
- Locking plate and locking bolt
- Steel dog bolts available
- Secure anti-pick, anti-drill, anti-snap and anti-bump cylinder locks
- Sidelights are installed with aluminium coupling bar for extra strength
- Flag hinges are fitted to Apeer70 doors to allow for adjustment
- Double rebated system adds additional draught protection by creating an internal secondary rebated seal
- Fully secured, aluminium reinforced cassette on glazing units
- Security and safety glass options

Warm and cosy

- Energy efficient
- Double or Triple Glazed
- 'A' Rated glass as standard
- Glass units come with the Q Seal warm edge Super Spacer® system
- Designed to reduce draughts
- Single or double rebated door options
- The high density thermally insulating core helps to keep the heat in and the cold out of your home

Traditional Composite Doors

Contemporary Composite Doors

Make a stylish entrance

Contemporary Composite Doors are ideal for modern homes, also adding an eclectic twist to more traditional properties. Contemporary Composite Doors are perfect for homeowners looking for a higher class of front or back door, without compromising on the appearance of their home. Offering exceptional security, contemporary composite doors are a hassle-free alternative to the standard PVC Entrance Door.

Create a solid statement with a Contemporary Composite Door

First impressions really count, so make no exceptions with your front or back door. Showcasing stunning styles and designs from our Composite Door ranges, this impenetrable entrance door choice features a remarkable insulating and secure foam core intelligently combined with a Glass Reinforced Plastic (GRP) skin.

Resistant to warping, cracking, fading and peeling, our Contemporary Composite Doors will look their best for many enjoyable years to come.

A style combination for every home

As well as a wide range of colour choices and finishes, the glazing type and additional hardware (door handles, letter boxes, etc) are also full customisable; allowing your own individual style to shine through every little bit of your home.

Contemporary Composite Doors offer exceptional energy efficient qualities, surpassing the likes of PVC Entrance Door performance. Utilising the perfect combination of thermally efficient double or triple glazed 'A' Rated, low-e glass, these technologically advanced entrance door structures reduce your carbon footprint. They provide considerable energy savings and have excellent weather resistant qualities too.

We use various brands for composite doors: Apeer, Diamond, Silka, Modo and Palladio.

Contemporary Composite Doors

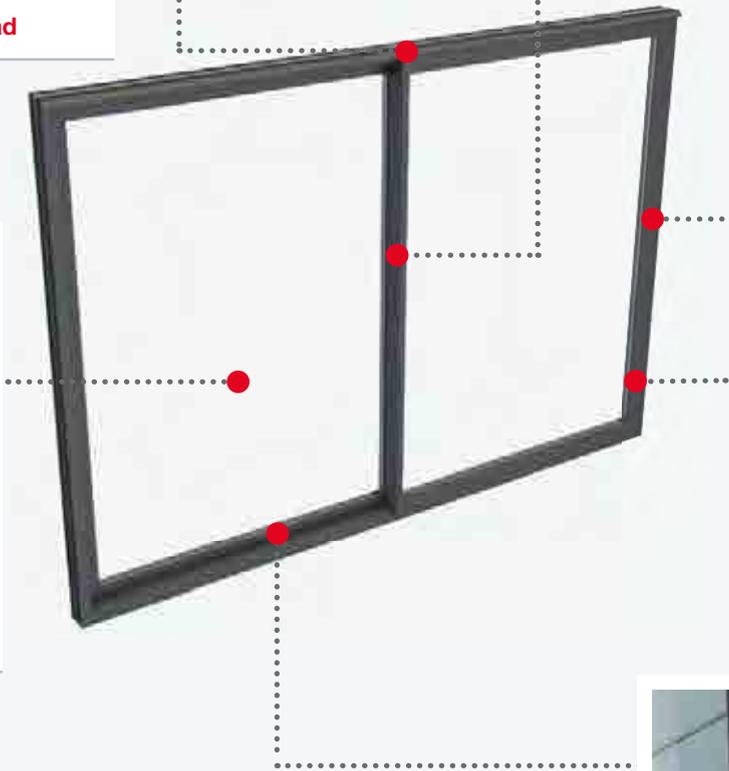

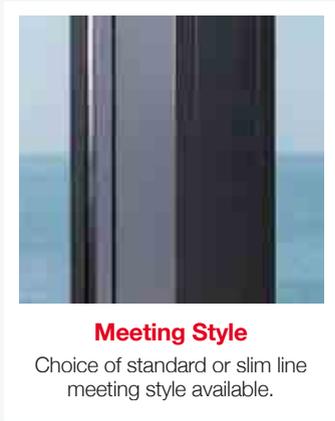

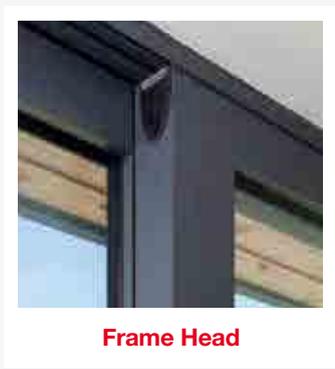

Which Aluminium Door is best for you

You choose

Offering the opportunity to open up your living space and bring the outdoors inside, our Lift & Slide and Bi-Fold Doors provide a great many benefits to virtually any property.

Lift & Slide Doors

- Large panes move to the side, stacked one behind the other.
- Double and triple track options for two, three and four sash systems.
- Maximise light and give the most unobstructed views when closed.
- Slim lines and discrete hardware.
- Ideal solution where space is limited.

Bi-Fold Doors

- Slim lines combine elegance with great performance together with smooth, easy and reliable operation.
- Multiple door leaves concertina to the side.
- Can incorporate a 'traditional door' for flexible use.
- Completely uninterrupted views when open.
- Great solution for small spaces.

Top & Bottom Roller

Sash rollers are designed and engineered to the highest standards to ensure quality and reliability. Our rollers are marked with the Smart 'Spark', so you can be sure they meet these exacting standards.

'D' Handle

Used to pull sashes from a folded open position to a closed position.

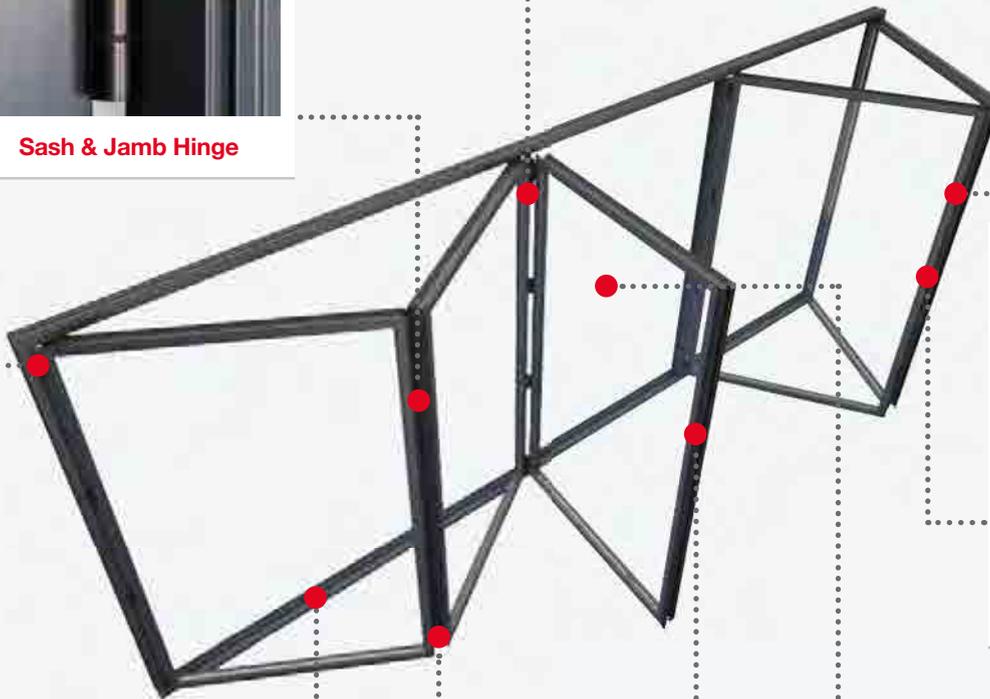

Sash & Jamb Hinge

Flat Sash Handle

Used to operate the locking shoot-bolts on the sashes.

Threshold

A choice of rebated or low level thresholds is available. Where the situation allows, thresholds can also be recessed into the floor level.

Bottom Roller

Main Operating Handle

We have a range of lever handle styles available, including high security PAS 24 options.

Opening

Slide folding doors open to reveal a nearly 100% opening aperture, bringing 'the outside in' and creating amazing living spaces.

Aluminium Lift and Slide

The bespoke door system

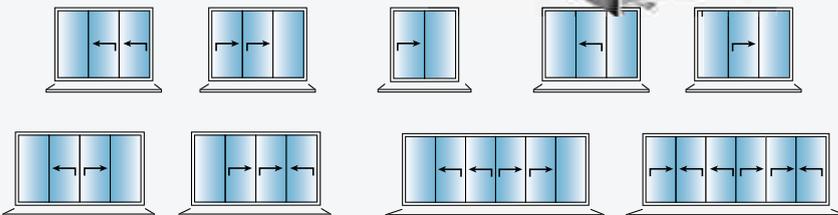

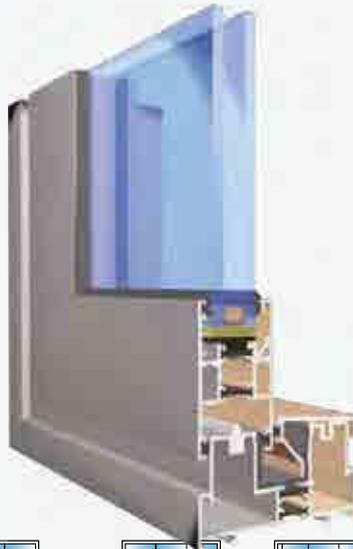

Our range of Aluminium Lift & Slide Patio Doors will add another level of sophistication to your home. Allowing beautiful views across your garden or surrounding countryside, these doors are a stunning addition that will impress. They allow an abundance of natural light into your home and are easy to use.

Our Lift and Slide Doors provide the maximum light and afford the most unobstructed views when closed and with our wide range of systems and options, you can select and tailor a door system to exactly meet your own specific requirements.

With a choice of frame sizes, sliding formats and two, three and four pane systems, together with a choice of high quality hardware and a wide range of colour options, the lines of these elegant doors make them the perfect solution for any home.

The profile has been designed to improve both strength and weather resistance. All main sections feature an extended polyamide thermal break that achieves a U Value of 1.6 W/m²K and are available in a broad range of both single and dual colours.

Lift and Slide Doors are perfect for applications where it is desirable not to have door leaves opening in or out of a room. Our customers also love them because they offer a far larger glass area than a set of French Doors or Aluminium Bi-Fold alternatives.

Some of you colour options *(for illustration purposes only)*

Design options

- Standard colours: anthracite grey, black or white
- Bespoke colours: we can colour match to your preferred RAL colour
- Choice of door combinations
- Choice of thresholds
- Handle colours: black, white or silver
- A range of glass to suit all requirements
- Flat glazing bead
- Marine Grade finish available

Enhanced security as standard

- Low maintenance
- Multi-point locking
- Security and safety glass options
- Three Star Diamond Rated cylinder lock with kitemark
- Four hook bi-directional locking system

Warm and cosy

- Energy Efficienta
- Thermally broken frame
- 'A' Rated glass as standard
- Typical 'U' Value 1.6 W/m²K
- Air Class 3, 600Pa
- Water Class 7a, 300Pa
- Wind Class AE, 2,400Pa
- Frame Width 53mm
- Frame Depth 100mm

Design limitations

- Max Sash Weight: 250kg
- Max Sash Height: 2,500mm
- Max Sash Width: within above limitations
- Kitemarked system achieving KM 530838 PAS 24:2012

Aluminium Bi-Fold Doors

Transform your space

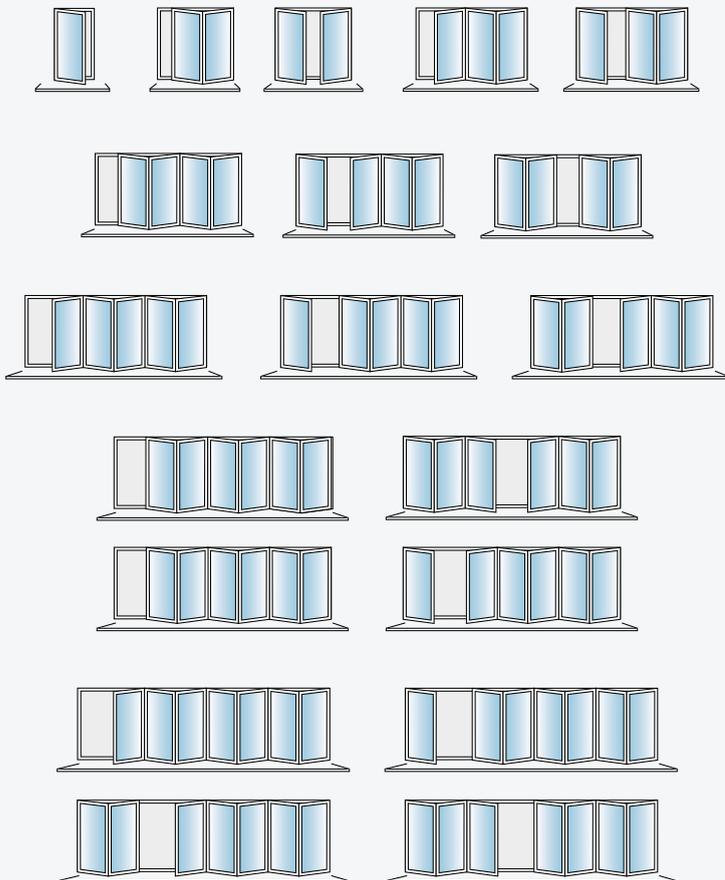

Aluminium Bi-folding Doors seamlessly blend your interior and exterior living space. They create a wider, open living space and flood your home with natural light. The aesthetic benefits of this product have made it a must-have addition for many homeowners.

Available in a range of opening configurations to suit any application, our Bi-Fold Doors can be folded internally or externally and with the opening at the side (so the sashes all fold one way), at one end (to create a single entrance door) or in the middle (to give the option of a double door).

The Bi-fold's flexibility makes it the ideal choice for projects where large, uninterrupted openings are required, providing maximum light and space to give unimpeded views. The highly-versatile, easy-to-operate system is the perfect option for even the largest project, capable of opening up an entire wall, yet presenting a contemporary, elegant glazed façade when closed.

Our profile features a thermal break to deliver enhanced thermal performance and energy efficiency and security is assured by multi-point lock mechanisms on the main opening sashes, and shoot-bolt locks on the 'floating' mullions.

The doors can have either a low threshold for unimpeded access, or a rebated threshold for improved weather resistance.

Design options

- Standard colours: anthracite grey, black or white
- Bespoke colours: we can colour match to your preferred RAL colour
- Choice of door combinations
- Choice of thresholds
- Handle colours: black, white, chrome or silver
- Bespoke sizes
- A range of glass to suit all requirements
- Flat glazing bead
- Easy glide rollers
- From 1 to 7 panels in various configurations
- Inward or outward opening

Enhanced security as standard

- Low maintenance
- Multi-point locking system to master door
- Security and safety glass options

Warm and cosy

- Energy efficient
- Thermally broken frame
- 'A' Rated glass as standard
- 'U' Value 1.5 W/m²K with suitable glazing unit 1.0
- Air: Class 4, 600 Pa
- Water: Class E, 750 Pa
- Wind Class 4, 1,800 Pa
- Document L compliant
- Enhanced security performance: PAS 24: 2016
- Frame width: 102.5mm
- Frame depth: 70mm
- Glass: Double or Triple glazed
- Max o/a height: 2,500mm
- Max o/a width: 1,200mm per sash
- Max sash weight: 100kg
- Marine quality polyester coated as standard

Aluminium Entrance Doors

A stylish welcome

Our premium-quality Aluminium Designer Door range delivers the perfect blend of beauty and performance, providing the warmest of welcomes to any home. Each door is bespoke manufactured to provide an elegant, high-performance and high-security solution for any home

Let us inspire you – Our range covers a wide variety of design options for all types of homes – from modern contemporary lines to more traditional and very unique styles. Whichever design you decide is right for your home, we have an extensive selection of further options to enable you to provide those all-important finishing touches.

Built to last – Our Aluminium range of doors deliver everything you need in terms of security, performance and quality. Renowned for its combination of light weight and high strength, aluminium is a great material for entrance doors, providing strong, elegant designs and outstanding long-life performance. With a lifespan measured in decades rather than years, together with extremely low maintenance requirements, aluminium has become the preferred choice for discerning homeowners.

Your security, our priority – Safety and security are central to the Designer Door range, each door meeting the requirements of PAS24. Every door comes with the choice of two high security locking mechanisms, either multi-point slam or a 10-point lock where the door can only be locked and unlocked with the key. All doors also have adjustable hinges, fully integrated glazing panels, tamper protection, drill-proof cylinders and fixing system which protects the lock body.

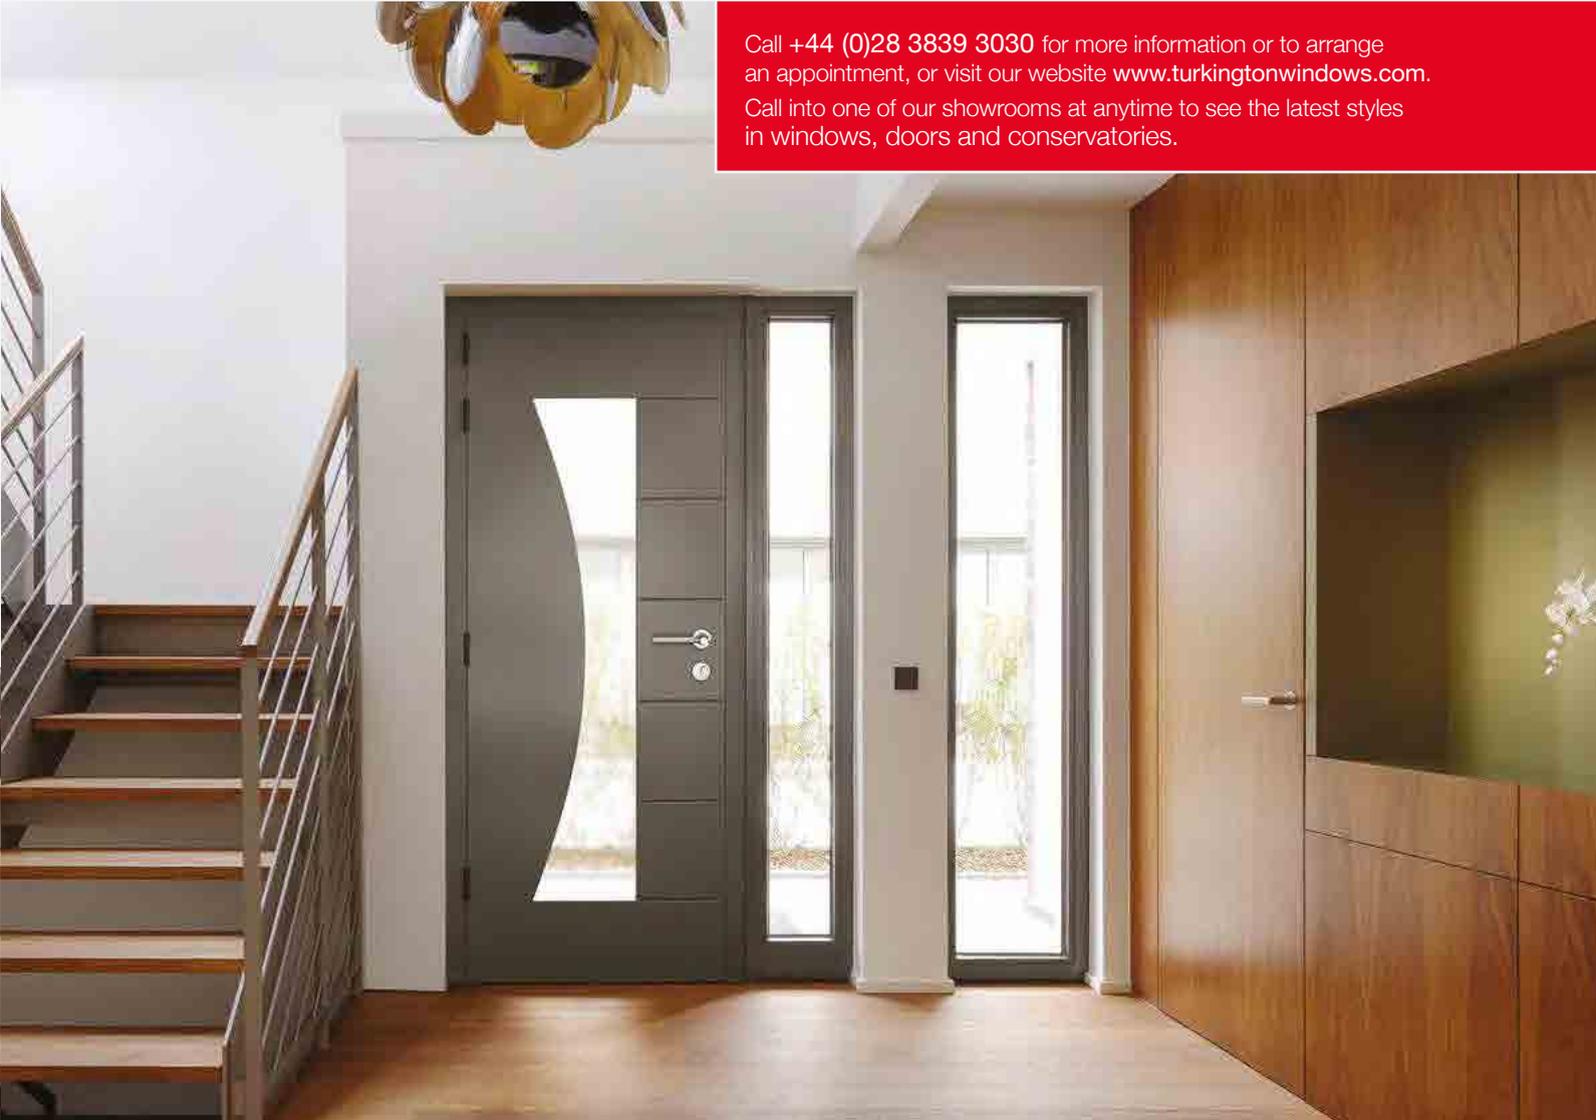

Uniquely yours – Choose your door style and experiment with different furniture, accessories, locking and colour options. We at Turkington can help you visualise the combinations on our CAD software to help you decide on the perfect one. Come and visit one of our showrooms see the options in person!

- Aluminium entrance doors offer exceptional energy efficient qualities, surpassing the likes of uPVC entrance door performance. Utilizing the perfect combination of thermally efficient triple glazed 'A' Rated, low e-glass, these technologically advanced entrance door structures not only reduce your carbon footprint. Considerable energy savings can also be made via their exceptional weather resistant qualities.
- Our Aluminium entrance doors come with an unrivalled range of colours which also include the bespoke Creations, Cotswold, Naturals, Sensations and Alchemy ranges.
- Security is at the heart of all of our home improvement products and we make no exception with our stunning traditional composite door systems. Rigorously tested to PAS 23/24 standards, our simple yet high security traditional composite doors provide absolute peace of mind with a full security package as standard, which includes high security shoot bolt locking as well as anti-drill, anti-pick and anti-snap cylinder lock barrels.

Home
Extensions
designed by you

Home Extensions

Extend your possibilities

There are few things which will enhance your home or add to your lifestyle quite like a home extension from Turkington. Whether you'd like to bring the garden into your home, have a little extra room to relax, or simply indulge yourself in a light and tranquil setting all year round, then Turkington has the answer for you. From the simple to the luxurious, a tailor-made Turkington extension is the perfect way to add style, space and value to your home.

Turkington will design and tailor your conservatory to suit your needs and complement your home. We use qualified professional surveyors and experienced designers to give the best advice and guidance on your design and build.

Designed by you

We work with you using the latest computer aided design software to let you shape exactly how your extension will look with your home.

We offer a wide variety of options on style, finish, colour and design detail to ensure you get all year round enjoyment for many years to come. Naturally each Conservatory, Sunroom, UltraRoof Conservatory or Turkington Garden Room is designed by you and is unique to you.

The only true limits to what you can achieve are your budget, the space available and your own imagination.

Turnkey service

At Turkington we guide you through every stage – from your initial ideas to design, survey, building works, plumbing, electrics and final installation – bringing your ideas to reality.

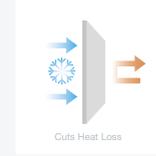

Once we finish all you need to do is add a skirting board, paint the inside walls then enjoy. You will be safe in the knowledge that you have a ten year guarantee from a company who value customer service and have been in business for over 70 years.

Smart roof glass – cool in the summer, warm in the winter

Our Turkington conservatories and lantern roofs use a technically advanced glass, specifically designed for glass roofs. Conservatories need to block out the heat from the sun in summer and retain heat in the colder days. Our glass package allows for better all year round performance, along with other key features such as increased security, UV reduction and true self-cleaning properties.

Roof glass specification

'U' Value 1.2

Measures heat loss through the glass unit in winter months. The lower the 'U' Value, the warmer in

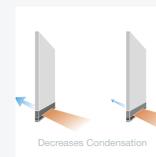

winter the room will be and with a **1.2 W/m²K** 'U' Value, this is almost three times better than a standard clear unit and 20% better than the UK's best selling low-e glass.

Solar Control

Helps reduce the build up of heat in the summer months, SMARTGLASS®-W

typically blocks out 52% of the sun's rays and offers 240% more solar protection than standard glass.

Warm Edge Spacer

Avoids heat loss at the edge of the unit, reducing internal condensation especially at the glass edge. Warm edge

spacer is typically up to 950 times less conductive than standard aluminium.

Anti-fade

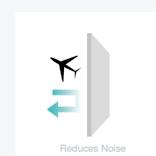

Blocks out 98% of the harmful UV rays that cause damage to soft furnishings.

Enhanced Security

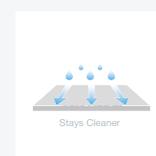

An additional security interlayer within the glass holds the fragments

together in case of impact, making it significantly harder to gain entry this way.

Enhanced Acoustics

For a quieter conservatory this option reduces audible sound by 40% more than standard glass.

True Self Clean

Uses the same coating as the roof, to prevent the build up of dirt and grime and reduces the frequency of cleaning.

Conservatories

A bright and airy new room

There are few things which will enhance your home or add to your lifestyle quite like a new conservatory from Turkington. Whether you'd like to bring the garden into your home, have a little extra room to relax, or simply indulge yourself in a light and tranquil setting all year round, then we have the answer for you. From the simple to the luxurious, a tailor-made Turkington Conservatory is the perfect way to add style, space and value to your home.

A conservatory has a fully glazed roof in glass or polycarbonate. They bring in lots of light and add a new type of room to your home. To facilitate sunshine, conservatories are built with at least 50% and 75% of glass on the walls and roof respectively.

Designed by you

We have a broad range of contemporary and modern designs and options to make your conservatory your own.

Edwardian

Sometimes also known as a Georgian. A flat-fronted style that offers excellent use of floor space due to a square or rectangular internal shape.

Gable

A high roof slope and the same floor space as an Edwardian. The front panel of the roof remains upright rather than sloping back to the centre.

Victorian

Its distinguishing architectural feature, a bay front, with either an angled (3 bay) or slightly curved (5 bay) front, combined with a steeply pitched roof and ornate ridge.

Lean-to

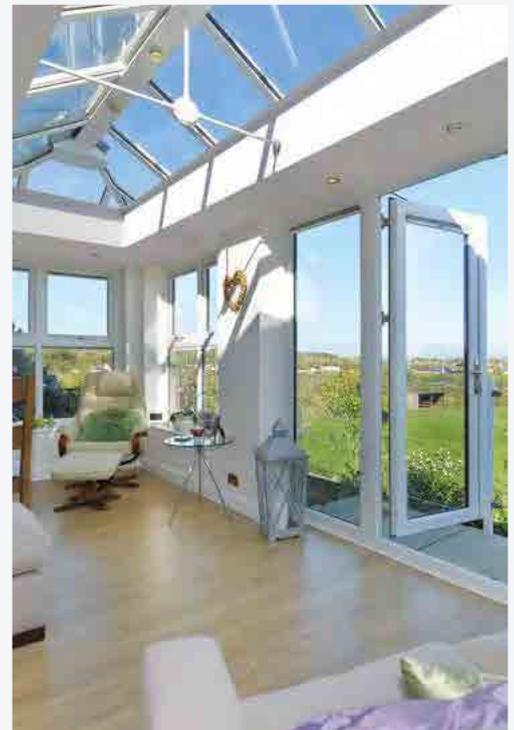

Sometimes called a Mediterranean. Ideal for properties with limited space under the eaves or an awkward area in which to fit a conservatory. A Lean-to offers a variable pitch to suit your home.

P or T Shape

The P or T Shapes take their name from the plan view of each design. Ideal for larger conservatories, a P Shape can combine for example a Lean-to and a Georgian. The styles are better suited to larger properties.

- Bright and airy
- Brings light into your internal room and see the stars at night
- Budget friendly
- Multiple uses meeting most peoples' needs and compliments most homes
- No impact on your rates bill
- Bespoke design options
- Easy clean roof glass, with blue tint and solar control for all year comfort
- Fully insulated walls and floor
- Building control not always required
- Quick build of around 6-10 weeks*
- Broad range of individual design and finishing options

* Depending on build type and circumstances.

Sunrooms

Cosy panoramic views

A sunroom is basically a conservatory with a solid roof and a vaulted internal ceiling. To put it another way, it is an extension with lots of windows designed to offer panoramic views. Sunrooms are specifically designed to strengthen the connection between indoors and out, allowing more natural illumination into the house and better views of the garden.

A sunroom is for those who really require an extension to their home to create more space. They can be used day or night any time of the year, so if the kids want to watch TV in the new room on a winters night then they can. Most of our clients choose to use these rooms as social spaces, often integrated into a large kitchen-diner. Some prefer to have a zone that allows them to easily relax 'outside'. A sunroom is a flexible space for relaxing, as well as entertaining and it will become a go-to space all year round.

Designed by you

Turkington Sunrooms come in a number of design options and we will help you choose products and materials that work in aesthetic harmony with your home.

Sliding and bi-folding doors can work as windows and an entrance – they'll look great and help connect with the outside. Additionally, skylights are also common to help flood internal rooms with natural light.

We offer a free expert design service, using state-of-the-art design software that lets you see what your extension will look like before it's built. Our designers will work with you from start to completed design to ensure that your sunroom is bespoke to you and your lifestyle.

- Bright and airy with a vaulted ceiling
- Multiple uses which adds an extra room for your home
- Compliments most homes
- Build of around 8-10 weeks*
- Broad range of individual design and finishing options
- Fully managed installation process including plumbing, build and electrics
- Professional clean on completion
- Building control certification
- Electrical certificate upon completion
- Bespoke design and multiple colour options
- Side walls with 'A' Rated toughened glass, internal cills and high security locking
- Fully insulated walls, floor and roof for all year use

* Depending on build type and circumstances.

Turkington Garden Rooms

Contemporary living

Our Turkington Garden Room range offers modern clean lines and an eye-catching contemporary feel. The roof lantern floods the interior with light, and the addition of large glass walls and roof overhang enhances the overall feel and practicality.

We use a Sika-Trocal roof which is designed for low maintenance utilising lightweight, durable and flexible membranes. Secondly, we build the shoulder higher than a standard sunroom or conservatory which lifts the ceiling higher which emphasises the big, tall and bright feeling of the Turkington Garden Room.

The roof incorporates an overhang around one, two or three sides and is a practical shelter where downlighters can also be fitted to create a great ambience. Our garden rooms are designed to open and airy and we often install aluminium Lift & Slide doors or bi-folding doors to enable you to open the room into the garden and to enjoy being inside but outside!

Designed by you

See how your garden room will look on your home before you buy. We offer a free expert design service, using state-of-the-art design software that lets you see what your Turkington Garden Room will look like before it's built.

Our computer software can superimpose a 3D rendering of your new garden room over a photograph of your home, so you can see exactly how it will look when built, allowing you to make any changes in design, before you go ahead with your choice.

- Bright and airy
- Striking contemporary design
- Build of around 8-10 weeks*
- Compliments most homes
- Multiple uses which adds an extra room for your home
- Bespoke design and multiple colour and finish options
- Fully managed installation process including plumbing, build and electrics
- Professional clean on completion
- Building control certification
- Electrical certificate upon completion
- Side walls with 'A' Rated toughened glass, internal cills and high security locking
- Fully insulated walls, floor and roof for all year use
- Flat roof with lantern glazing

** Depending on build type and circumstances.*

UltraRoof Extensions

Warm, bright and beautiful

Create a stunning home extension with an UltraRoof conservatory.

This exciting modern roof combines a heavily insulated tiled vaulted roof with large spans of glass. This brings plenty of light into the extension and adjoining rooms whilst keeping the space at a comfortable temperature throughout the year.

UltraRoof is a fantastic option for your home extension.

Design your personal space

UltraRoof's stunning interior features an internal pelmet which is the perfect place to house downlights or speakers. Plus, no matter what style or shape, Ultrarroof never needs a tie bar, this means that the interior will always feature an uninterrupted vaulted ceiling, which further adds to the sense of space.

On the outside, Ultrarroof can be personalised with a decorative cornice, an external soffit, and a choice of three lightweight tiles or tiles used on the roof of your home.

Transform your existing conservatory or build from new

If you are replacing your conservatory or building your conservatory from new UltraRoof will provide bright room that is consistently the same temperature as the rest of your home.

One advantage of our UltraRoof is that it can be installed onto the existing base (subject to survey) and save potentially expensive additional building costs.

Super strong for grand designs

Ultrarroof is designed for large spans of bi-fold doors and can span up to 4m unsupported. The integrated full length glass panels in the roof ensure your extension and any adjoining rooms are flooded with natural light.

With a tiled roof, it is important to consider the exact location in which it will be installed and that the extremes of weather are taken into account during the design process. Our specialist software ensures that every UltraRoof is structurally engineered to withstand the worst potential wind and snow loads for your specific full postcode – providing you with complete peace of mind, whatever the weather.

Designed by you

See how your new room will look on your home before you buy.

We offer a free expert design service, using state-of-the-art design software that lets you see what your UltraRoof extension will look like before it's built.

Our computer software can superimpose a 3D rendering of your design over a photograph of your home, so you can see exactly how it will look when built, allowing you to make any changes in design, before you go ahead with your choice.

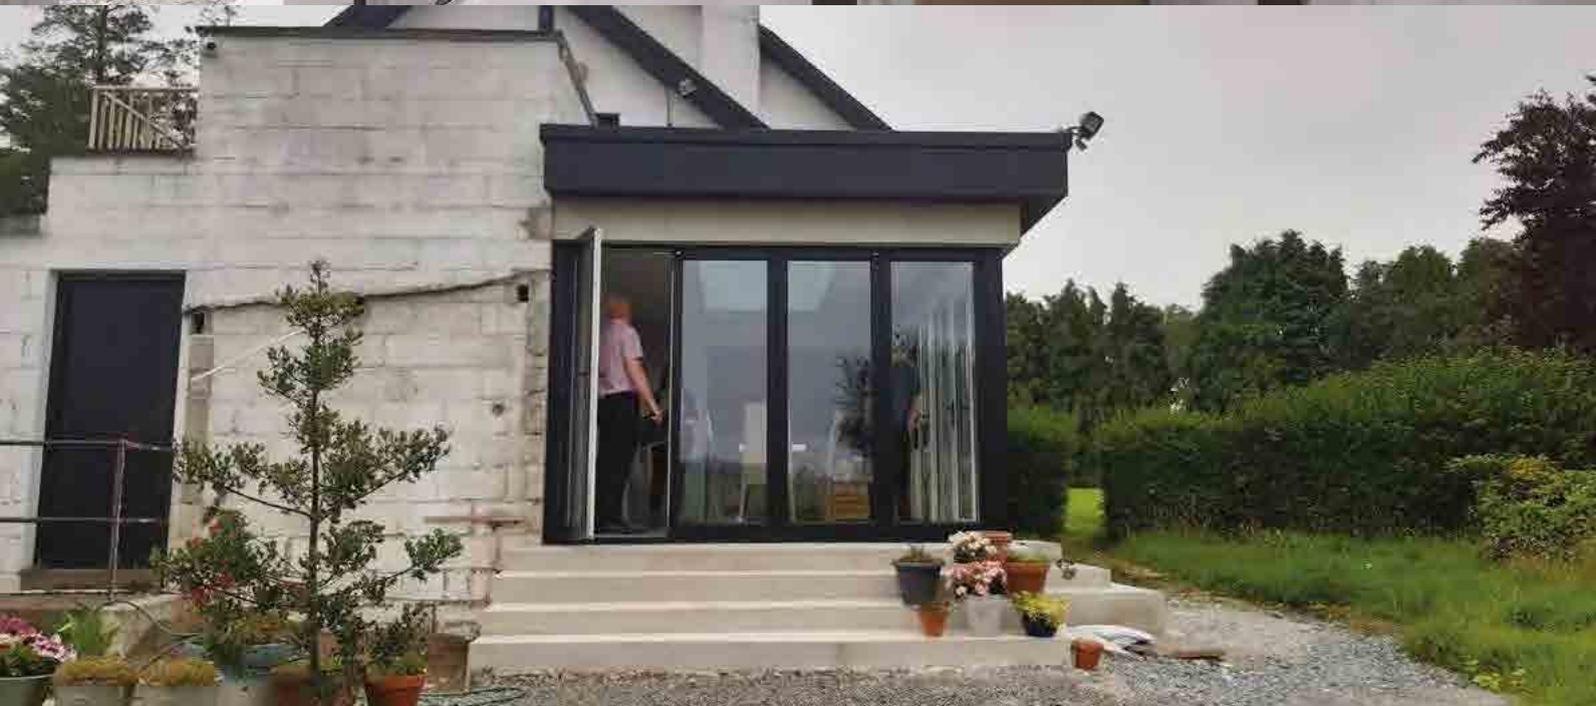

- Building Regulation compliant
- Elevated vaulted ceiling
- Fast to build for less disruption
- 10 year guarantee
- Unrivalled thermal efficiency
- Engineered to postcode
- A warm, cosy space throughout the seasons
- Full length glazing
- Fully fire tested
- Complete warm roof system, with no cold bridging

Commercial Projects

Commercial Projects

Leading the industry

As the leading specialist, Turkington Windows has been successfully delivering commercial windows, doors and curtain walling contracts for over 35 years throughout the UK and Ireland.

First for Commercial Windows, Doors and Curtain Walling

Turkington's product range includes curtain walling, structural glass curtain walling, window and door systems in both Aluminium and PVC, roof glazing, glass canopies and automated doors – all manufactured using leading locally sourced systems and components to ensure the highest levels of quality across the range.

We install only the highest quality products to meet the aesthetic and functional requirements of architects, specifiers and contractors. All of our window, door and curtain walling systems have been rigorously tested to BS EN Standards for wind resistance, water tightness and air permeability and we have product options available to meet PAS24 and 'Secured by Design' requirements.

Aluminium and PVC

Experience counts

We have extensive experience in a variety of applications including new build and replacement projects across a diverse contract portfolio, ranging from new build housing developments to commercial curtain walling and glazing contracts for retail, commercial, industrial, education and healthcare projects.

Our experienced team understand industry needs and work collaboratively with our clients to guarantee a high level of service throughout the contract ensuring lead-times are minimised and contracts are completed on time, on budget and to the clients and end users satisfaction. As part of our commitment to excellent service we will assist in value engineering projects to meet tender pricing requirements, provide working CAD drawings and design details to architects and contractors as required and can also provide project specific 'U' Value calculations to ensure thermal performance requirements are met.

Product options

- Aluminium windows, doors and curtain walling
- PVC windows, doors and composite doors
- Toggle glazed and silicone pointed curtain walling
- Structural and bolted glass curtain walling and balustrades
- Glass canopies and roof glazing
- Brise soleil

The Turkington Guarantee

Quality you can trust

The Company will honour the following guarantees:

- For a period of ten years from the date of installation the Company guarantee to repair or replace any PVC framing which proves defective due to faulty workmanship, faulty materials, or corrosion.
- For a period of ten years from the date of installation the Company guarantee to repair or replace any hermetically sealed glazing units on standard glass units which develop a fault (including condensation between the glasses of the sealed units) due to defective materials or workmanship. There is a five year guarantee on sealed glass units in windows and doors with surface mounted astragal bar. Oversized units are not guaranteed. Glass units containing stained glass are not guaranteed.
- For a period of one year from the date of installation the Company guarantee to repair or replace all hardware such as locking devices and other ironmongery which develops a fault due to defective materials or workmanship.
- For a period of one year from the date of installation the Company guarantee to repair or replace all minor installation defects, including all associated building, electrical and plumbing work, GRP Canopies but excluding hardware.
- For a period of one year from the date of installation the Company guarantee to repair or replace door panels and composite doors which develop a fault due to defective materials or workmanship. There is also an additional nine year guarantee to repair or replace, free of charges, for materials, door panels and composite doors which develop a fault due to defective materials or workmanship i.e. during this further nine year period there will be a £65 charge for labour (or at the rates applicable at the time).

Paid in Full: The Company's Guarantees referred to above are dependent on the customer having paid in full all sums due under this contract. Upon discovery of a defect, the customer is required to give written notice to the Company within 28 days of installation. We cannot accept liability for marks on PVCu surfaces and/or on exterior surfaces of glass.

Proper Maintenance: Damage due to lack of maintenance, misuse and faults or premature deterioration resulting from the customers failure to comply with the Company maintenance instructions are not covered by the above guarantees.

Transfer of Guarantee: This guarantee may be transferred with the Company's consent but is subject to the Company's approval after an inspection of the installation and an administration charge of £250 (or at rates applicable at the time).

Post Guarantee Service: After expiry of the above guarantees the Company will endeavour at the customer's request, to carry out repairs / replace parts and materials, such work being subject to charges for labour and materials. The customer shall satisfy themselves as to the likely cost before instructing the Company to proceed with any such works. A call out charge. for inspections and adjustments to windows and doors will be applicable.

Call Out Charges: There is no charge for a call out during the ten years or 12 month guarantee periods unless the damage is due to misuse, neglect, or lack of maintenance. In such circumstances a call out charge of £65 is applicable. Conservatory inspections and call outs are charged at £100 where applicable.

Supply Only: If goods are sold on a supply only basis the Company's guarantee will not cover any installation work carried out by other parties.

Coloured Finished Hardware: The coloured finish (black, brass, white, silver) of door, window handles and face plates along with knockers and lettered plates carry no warranty whatsoever for surface appearance.

Condensation: Although double glazed units can reduce condensation on glass, variations may exist in different types of property, therefore, no guarantee is given in respect of the prevention of condensation.

Visual Quality of Glass: As a member of the Glass and Glazing Federation the Company works to their guidelines in respect of the quality of glazing.

The following is the GGF Professional Check:

- Stand in the room no less than 2 metres away from the sealed unit and look directly through it.
- For toughened, laminated or coated glasses, stand no less than 3 metres away.
- Where it is not possible to stand at the right distance then stand as far away as you can from the sealed unit.
- Do so in natural daylight, but not directly towards the sun and with no visible moisture on the surface of the glass.
- Exclude 50mm wide band around edge of the glass from the check.
- Glass must be viewed at an angle of 90°.

What the Purchaser Should Expect: Flat transparent glass, including laminated, toughened or coated glass is acceptable if the following are neither obtrusive nor bunched:

- Bubbles or blisters.
- Fine scratches not more than 25mm long.
- Minute particles.

The obtrusiveness of blemishes is judged by looking through the glass, not at it, under natural light. It must be understood that the glass used in sealed units is a processed glass, and as a consequence, blemishes are to be expected.

The above is correct at time of printing (March 2023).

The Testimonials from recent clients

Our customers are happy customers

Windows

Mr. McL – Newtownabbey

“Very pleasant and efficient installation team who left the window and room in perfect condition. Many thanks.”

Mr. M – Portadown

“Great job, very satisfied.”

Mrs. McC – Belfast

“I honestly cannot thank you enough for your service! We had wooden sash windows which were drafty, and you could hear the traffic loudly through them! But now with our new Turkington sash windows, it’s like a transformation; no draft and can hardly hear the traffic. Your service was also excellent, from the showroom right through to installation, all your employees were a joy to deal with. I honestly can’t remember feeling so genuinely happy about a purchase, and feeling it was 100% money well spent. Thank you thank you thank you – we can now sleep a lot better and even save money on gas. Have a nice Christmas... We will be back! And recommend to anyone that asks!”

Mr. D – Ballinderry

“May I say from the start that during early June ’21 we entered your Lisburn showroom we were greeted by a lovely gentleman call Phillip. He was very gracious and knew his brief thoroughly. He visited our home and gave us the design ideas which we agreed to, although we did have to wait over six months for installation...I was absolutely delighted that you sent Marc and Mo to install our windows. I have never seen better workers anywhere... Marc was so so fussy and is a master craftsman. Well done Turkington, as we live in a world of complainers it is nice to get a pat on the back now and again. Blessings...”

Mrs. L – Lisburn

“I was very satisfied with the installation team when I got new windows fitted... There was very little disruption to my home. They were also very tidy, and I would recommend Turkington to my friends and family. The surveyor was also very good at answering my questions when he came to carry out his job.”

Mr. T – Newtownbreda

“Outstanding Service! We were given a date for fitting of door weeks beforehand, and unlike many other companies the door was fitted on the exact date given! So impressed. Door fitted perfectly!”

Mr. R – Ballynahinch

“Overall very satisfied with product and service. We needed to replace original hardwood windows and doors which were drafty but had been holding back in case there would be a lot of disruption and making good required. In the event the disruption was minimal and well managed, and any repairs – which were minor – were dealt with. Much of this is due to our fitters – Timmy and Richard who were excellent... thanks for a great job, well done.”

Mr. J – Helens Bay

“A superb job in the middle of winter... all the staff excellent.”

Mrs. W – Portadown

“My experience from Turkington windows from beginning to end has been very satisfactory and I would recommend Turkington windows to anyone.”

Mr. C – Keady

“Very prompt and efficient service.”

Conservatories

Mr. T – Craigavon

“Great service, great job. Would certainly recommend to family and friends. Sales staff were very knowledgeable and gave good sound advice.”

Mrs. H – Laurelvale

“From the first telephone call to the finish, Turkington were first class. I was kept up-to-date with everything going on and the workers were pleasant, helpful and very punctual. Extremely hard workers that knew what they were doing! I would recommend them for sure. Thank you for my lovely conservatory.”

Mr. T – Lisburn

“A very positive experience from entering the Lisburn showroom until completion. All workmen arrived on time and as planned and were proficient in their areas of work. A special mention to Nigel who co-ordinated the entire project in an efficient and courteous manner. We look forward to enjoying the conservatory...”

Mr. & Mrs. H – Dromore

“Very content with the whole experience.”

Mr. P – Carrickfergus

“Gary and Tony removed the old conservatory very quickly without any mess and quickly installed the new framework. Very professional in all their work. They worked really hard taking little time for lunch etc. Adjustments to windows were carried out as requested.”

Mr. A – Lurgan

“From the outset of the process of deciding upon a conservatory for my property I contacted Turkington as I had previously used their services in a previous property. The whole process went smoothly as planned. Advice, planning, preparation, construction, erection and completion of the conservatory proceeded without any problems. Excellent workmanship and attention to detail and professional services provided by the staff was very much appreciated. The whole experience was an enjoyable one sitting in a first class addition to my property. I would wholeheartedly recommend Turkington to others... A first class experience from start to finish.”

Windows and Doors

Mrs. C – Belfast

“Very good. Two great workers fitted windows and back door.”

Mr. C – Lurgan

“Excellent service. Installation went like a dream. Good quality windows – why use anyone else?”

Mr. S – Dundonald

“This is the second time we have dealt with your company and have again experienced an excellent service. The installation team were excellent... the end result was a first class finish and again our thanks...”

Mr. M – Bangor

“We were very happy with the installation of our front door and side panels last year. We therefore had no hesitation in using Turkington for this door. Friendly staff at all levels and excellent workmanship.”

Mr. W – Moira

“I would like to thank (your fitters) who worked on my new doors; I am delighted with them. Your staff were lovely to work with and nothing was too much trouble. Please pass on my many thanks...”

Mrs. McK – Kilkeel

“Very impressed with this firm from the first time I entered the showroom and spoke to the salesman until today when the work was completed. A very professional job from beginning to end.”

Mr. G – Hillsborough

“...our experience so far has been of professionalism by all members of the team: Sales, Surveyor and Installation by David and Ross. Long may it continue!”

Mr. M – Bangor

“...great workmanship which we have previously experienced through Turkington.”

Mr. B – Belfast

“Satisfied from the start. No pressure from the salesman. All questions answered and everything explained before contract signed.”

Mr. P – Portadown

“Seamless service throughout. Excellent service from start to finish. Many thanks.”

Fascia & Soffit

Mr. D – Portrus

“First class from a professional team. Thank you.”

Mr. S – Newry

“The team were very friendly and carried out the installation quickly with brilliant attention to detail. Beautiful job, very satisfied...”

Doors

Mr McC – Belfast

“We appreciated the advice we received when choosing the door, and that it was tailored to our requirements. Communication was excellent – at all times when we contacted the company we received helpful friendly advice.”

Mrs. M – Magheralin

“We had a very good experience with Turkington from start to finish. Mark was very helpful and professional. We are happy with our new door.”

Meet your team

Experience counts

We have been fitting doors and windows for many years now and during that time we've grown to one of the biggest installers of doors, windows and extensions on the island of Ireland.

Here to help

Every customer and every window are important to us, from your initial contact through to you being a happy customer at the end.

Throughout the process, from reception to sales, survey, order processing, stores, fitting and after care we have many years of experience. Here is the team that makes this possible.

“The team of two workers arrived as arranged. They were very courteous and considerate inside our home, completing the job as agreed and cleaning up as they went along. Altogether a very satisfactory job, thank you. We would not hesitate to recommend and use Turkington again. We were also impressed that all the preliminary measurements, surveys etc were thoroughly carried out in advance, preventing any hiccups.”

Mrs M, Waringstown

Considering quality new windows, doors or an extension installed by experienced experts? You're in the right place.

From start to finish...

Lorraine, our happy Turkington receptionist.

The sales team. Years of experience in product knowledge and design.

A sales representative using modern CAD software to help you design your windows, doors or extension to your specifications. Everything we do is designed by you.

Our surveyors are fully qualified – they confirm sizes to the millimetre and ensure your installation is smooth and planned.

Our order processors use modern systems to ensure your designs are produced accurately.

The Turkington back office team manage your order from contract to installation, naturally this includes secure accounting for your protection.

In the Turkington stores we prepare your frames for delivery.

Our extensive store allows for safe holding. We then package every order for the fitters to ensure 'Right First Time' delivery.

Experienced installation teams know what they are doing and treat your home with care and respect.

Installations completed to the highest standard.

We invest in our teams with on-going training and, as you would expect, we are fully accredited and insured.

The Turkington 10 Year Guarantee means something... our dedicated aftersales team are here to ensure you continue to enjoy your windows, doors or home extension for years to come.
